Washington State Transactions

## Washington State Transactions by Industry

### News highlights:

- AstraZeneca and VentiRx, will combine the experimental PD-L1 cancer immunotherapy durvalumab in an open-label Phase I/II trial with VentiRx’s investigational cancer vaccine motolimod. These will be added to chemotherapy, in locally advanced or recurrent ovarian cancers that have become resistant to platinum chemotherapy.
- PhaseRx filed for an initial public offering, seeking to raise \$25.3 million. That number could grow to \$30.4 million, as the company plans a future registration of \$5.1 million that covers a loan from investors.
- PotaVida, which designs bags that purify water with sunlight and collects data on how the bag is used, is conducting a test in mid-May. PotaVida will team up with Seattle-based aid group World Concern to distribute the bags in Haiti and demonstrate that they can effectively collect data in the field.
- Seattle biotech startup ID Genomics, Inc. has been awarded a prestigious three-year, \$3 million grant by the National Institutes of Health (NIH). The company will use the funds to continue development of its digital technology to compile a database of antibiotic resistance profiles of individual bacterial strains.

LIFE SCIENCE  
INNOVATION  
NORTHWEST

### Attend Life Science Innovation Northwest (LSINW) June 1-2, 2016

LSINW connects **world-class industry leaders** and showcases the Pacific Northwest as a **global center for life science advancement**.

Washington State Convention Center Seattle, WA

Featuring Keynote Speaker:

**Leroy Hood, MD, PhD**

President & Co-Founder, Institute for Systems Biology
