SAFETY MONDAY

GET OUT AND LOOK! (G.O.A.L)

- Signal your intentions by giving your horn a light tap.
- Use your four-way flashers.
- Set the parking brake.
- Use 3 points of contact, facing the vehicle, when exiting and entering.
- Nothing can replace the information gained by using your eyes on potential hazards.
- Walk around your vehicle to get a complete picture of what you are backing into.
- Walk the pavement surface looking for depressions and fixed objects, and be certain pedestrians are a safe distance from your vehicle.
- Look up! Hazards may come in the form of power lines, awnings, or even building overhangs.
- Check side clearances and adjust your mirrors.

Get to it! After checking, start backing IMMEDIATELY before the picture changes.
