

TOP FIVE DIFFERENTIATORS

Proprietary Pricing Database

The APPI Energy proprietary database of more than 250 million records compiled during 22 years of experience enables our team to benchmark historical and real-time prices in every deregulated market.

We update prices daily across all service territories, and review thousands of prices every day to deliver data-driven solutions, and true apples-to-apples price comparisons.

Our team of experts uses our database of daily supplier prices to benchmark contract start dates and terms, and to identify the lowest supply prices to help you make a smart buying decision. Decisions about when to buy and contract length are based on data, analytics, and expertise.

158 Affinity Endorsements

APPI Energy is endorsed by 158 affinity groups, trade associations, and chambers of commerce across the U.S., covering industries including healthcare, manufacturing, property management, retail, and nonprofit.

Each association's Board of Directors vetted and approved APPI Energy to provide data-driven procurement and consulting solutions to members.

We provide quarterly financial, operational, and marketing status reports to associations, to ensure that we help members reduce electricity and natural gas costs on an ongoing basis.

Ethical, Unbiased & Independent

We serve as an advocate for our customers only, never utilities or suppliers. Managed by a Corporate Counsel, our consulting team pursues industry and professional excellence. A high level of ethics and expertise is our foundational standard. Our consulting process delivers solutions that are customized to each customer's unique energy needs, and is always in accordance with each customer's internal timing and procurement policies.

Our due diligence of suppliers is done with our customers' best interests as the focal point. APPI Energy maintains relationships with 46 suppliers that we vetted and continuously monitor to meet our customers' energy needs. Only 18% of suppliers meet our stringent evaluation, which includes a review of financial stability, billing accuracy, customer service, competitive pricing, management experience, and fair supply contract terms and conditions.

Exceptional Customer Service

Our Customer Service team interacts on your behalf with utilities and suppliers to ensure smooth transactions.

During the last year, APPI Energy resolved 599 customer service cases, including account changes, billing needs, and customer requests. The APPI Energy Customer Service team verifies bill accuracy and resolves billing errors and credit issues.

We evaluate utility programs and regulatory policies to identify opportunities for reimbursements and financial incentives that save you money. For example, our team determines if you qualify for energy sales tax exemptions, and secures refunds at no cost to you.

22 Years of Proven Experience

Since 1996, we have provided data-driven procurement and consulting solutions to customers in deregulated energy markets across the U.S.

The firm's founder and original management team continue to own and operate APPI Energy today. Our 37-person staff includes an in-house Corporate Counsel, a customer service team, a data-driven operations department, information technology experts, regulatory analysts, and a marketing team.

58% of APPI Energy consultants have earned the Association of Energy Engineers' Certified Energy Procurement Professional credentials.
