CARRIDA Technologies GmbH

10 Hedgerow Drive
Hudson, NH 03051
603.598.2588
etoth@vision-components.com
vision-components.com/en

CARRIDA Technologies GmbH is your partner for ALPR solution.

Simple Mission: Detect all cars and read all license plates
The basis to achieve our goal is the CARRIDA software engine. It is based on modern AI technology and one of world’s best recognition software suite. It is designed for all kinds of ALPR/ANPR applications.

CARRIDA Software Engine—A powerful OEM library
Our software engine is easy to integrate into existing security and surveillance ITS applications. It is fully hardware independent and runs on Windows and Linux PCs and advanced RISC machine (ARM) architectures on Linux and Android. A very fast processing speed of typically 15-20ms per frame enables the reading of license plates from vehicles traveling up to 240km/h (150mph).

Probably the world’s smallest OEM stand-alone ALPR/ANPR camera solution
With our intelligent cameras we can offer you one of the smallest standalone ALPR/ANPR camera solutions in the world. We combine our software engine with an intelligent camera. Therefore, we can process the collected data stand-alone within the camera itself.

Detect and read vehicle license plates and car models
Adding Make and Model recognition to your ALPR/ANPR solution results in higher recognition accuracy for a higher security level. This can be archived with the positive match between the car and its license plate. Smart parking or access control solutions can be successfully mastered by the system.

DoorKing, Inc.

BOOTH 445
120 S. Glasgow Avenue
Inglewood, CA 90301
800.826.7493
doorking.com

Keypads, card readers, high security RFID and automatic vehicle identification systems are just a few of the access control products offered by DoorKing. Complementing our AVID systems are hanging tags, license plate tags and windshield/ headlight tags. We also offer cellular connected cloud programming for our access systems.

MEYPAR USA CORP

BOOTH 343
21755 I-45, Building 11, Suite D
Spring, TX 77388
346.220.4619
info@meypar-usa.com
meypar-usa.com

MeyparUSA, is an innovative Parking Access and Revenue Control Systems manufacturer, providing complete solutions tailored to your needs, with local installation, support, and service. We offer automated solutions for every kind of facility imaginable. We manufacture all our hardware, and design and implement all our software, including our on-cloud solution, Nexus.

Dealer Inquiries Invited!

*NPA INDUSTRY PARTNER*
Parkonect is the next generation of parking technology. With multiple contactless options, our cloud-born platform works with any parking facility, of any size. From our full PARCS to our plug-and-play IoT add-on readers, our solution has practically no moving parts and is virtually maintenance-free. With our real-time, built-in BI tools and analytics, Parkonect is specifically designed to strategically maximize profitability and asset valuation, while being agile to changing market conditions.

Gen2 is Parkonect’s latest IoT full PARCS platform, advancing our industry-leading QR-code based cloud solution to meet a broader parking audience. Our Gen2 terminals come with a massive 16” interactive touchscreen, enabling dynamically driven rates. Coupled with multiple contactless solutions such as Text2Enter, mobile POF (ParkingCashier.com), LPR, Bluetooth, AVI and over 85 “out of the box” API integrations with third-party channels, Gen2 gives you the power and flexibility needed in the new, touchless world of mobility.

Knowing the customer journey varies by facility; Parkonect provides unique, customer-centric digital products that can be tailored to your specific needs. And, because our parking platform continually evolves through instant cloud and over-the-air updates, we’re always adding new features and functionality to make sure you’re never stuck in the past.

Altogether, Parkonect is much more than just hardware and software! Parkonect equips our customers with meaningful and actionable information needed to make real-time, strategic decisions that drive profitability, all while giving your customers the experience they expect in today’s technology connected world.
ParkMobile
BOOTH 401

8900 Keystone Crossing, Suite 700
Indianapolis, IN 46240
317.524.7426
SMcGowan@t2systems.com
t2systems.com

For universities, large healthcare facilities, and municipalities who want to achieve operational excellence with a proven enterprise management platform, the reliable T2 PARCS solution helps control access and generate revenue. T2 PARCS is powered by T2 Flex, the parking industry’s original and premier hosted parking management software.

*NPA INDUSTRY PARTNER*
Ensuring parking enclosures remain safe, secure, and readily accessible for approved entry presents challenges as varied as the facilities as they support. As a market leader in Automatic Vehicle Identification (AVI) systems, TransCore’s broad portfolio of radio frequency identification (RFID) tags and readers addresses the full spectrum of access control challenges. TransCore’s RFID-based access control systems increase security, reduce delays at the gate, improve the overall customer experience, interface seamlessly with existing back-office operations to help improve revenue control, and enable parking administrators to more easily manage facilities and support their customers.

**Patron Security**

Parking patrons appreciate the added security of RFID-based access because it eliminates the need to stop at a facility entrance, roll down the window, swipe a card, or take a ticket. RFID-based access offers patrons a truly hands-free experience.

**Based in the U.S.**

TransCore is based in the United States and provides the convenience and security of interoperable, hands- and battery-free technology. In fact, TransCore’s multiprotocol readers can be programmed for use at participating airports, toll roads, and even sports facilities and stadiums to provide convenient, efficient access, which can help minimize the stop-and-go associated with traditional parking facilities. By enabling automatic access, carbon emissions have been shown to decrease due to reduced vehicle idling.

TransCore developed the transportation industry’s first RFID applications in the 1980s at Los Alamos National Labs. Since then, the company has deployed more than 100 million tags and over 101,000 readers worldwide.

Your job just got easier and more profitable, with DESIGNA Parking Management Systems.

How do you deliver the best customer experience for your parkers and improve your profitability? Achieving these goals is our driving force and we have a proven track record of exceeding expectations. Everything starts with your customers, understanding their needs, the requirements of the marketplace, and new technology that brings additional value.

We are proud to provide state-of-the-art, reliable and scalable technology based on comprehensive parking management solutions. Our Parking-as-a-Service offers both software and devices on a monthly subscription, for the industry’s best future-proof parking management solution.

We are global market leaders in all vertical markets, from the most complex application to single installations.

We are proud to have developed new parking systems for more than 200 airports worldwide, including the four airports of the Port Authority of New York & New Jersey, Denver International Airport, Miami International, Frankfurt Airport and Charlotte Douglas International. We also provide state-of-the-art parking solutions for numerous hospitals, and we work with many municipalities to create value-added parking solutions for their cities and towns. Our integrated solutions consist of software, hardware and service components.

We continue to be the market leader in the digitalization of parking management systems. DESIGNA has been providing secure cloud-based management systems since 2009, which gives us over a decade of experience in digitalization. With a large network of partners and subsidiaries in 60 countries, DESIGNA is one of the world’s leading providers of fully automated parking systems.

DESIGNA has leveraged the new possibilities of digitalization in our NEXT Solution – a scalable, cloud-based system that provides a world-class, robust, state-of-the-art parking management system at a lower cost. The modular system lets you easily add new extensions, capabilities and features as needed, such as pre-booking, dynamic pricing, dynamic analytics, mobile ticket payment, web validations or connectivity.

We will help you achieve your goals smarter, faster and more profitably. It’s as easy as navigating through your smartphone.

We change the world of welcoming people

SKIDATA is an international leader in the field of access solutions and management in ski resorts, stadiums, airports, shopping malls, cities and amusement parks. We provide secure and reliable access and entry control for people and vehicles.

The end customer’s behavior is the intrinsic driver of our innovations. That’s why we literally take the driver’s seat: What is important for the end customers? What is convenient for them? Everybody wants to feel welcome. Everybody wants transactions to be convenient. And everybody wants to feel safe. And that’s why we keep on thinking ahead about which services contribute to improve the customer convenience and about how digitalization can make things easier for the end customer.

To stay true to SKIDATA’s core value of exceeding their customers’ needs, our purpose is: “We change the world of welcoming people”. This serves as a promise to turn access into a warm welcome while fulfilling end-customers’ essential need for convenience and safety in all situations.

SKIDATA Group (www.skidata.com) solutions is part of the Kudelski Group, a publicly traded (SIX: KUD.S) worldwide leader in digital business enablement technologies that encompass digital content security, public access, cybersecurity, and IoT.

**Magnetic Autocontrol**

**BOOTH 438**

3160 Murrell Road
Rockledge, FL 32955
321.635.8585
info@magnetic-usa.com
magnetic-access.com/usa

Magnetic Autocontrol, a wholly owned subsidiary of the FAAC Group, is a leader in the parking and security field for providing quality solutions for pedestrian and traffic control. We offer locally manufactured products that are designed, engineered, manufactured, and installed specific for your application, while being supported with our proven service.
The Housing Company was founded in 2001 by Steve Hale and Doug Cram because of what Steve and Doug perceived to be a major problem in the Gated Entry, Parking Controls and Perimeter Security industries. That major problem was simple: the only housings for mounting card readers, intercom stations and cameras; and for the containment of wireless transmission devices, were made of metal. Metal not only inhibited the performance of RF devices, it also becomes dented, rusty and requires painting and other maintenance. This was the impetus that birthed The Housing Company, whose core products were three different sized injection molded Lexan Polycarbonate Housings designed specifically for the afore mentioned applications. Another result of injection molded polycarbonate Housings is the ease with which the Housings can be customized using standard hand tools, a feature that has made our Housings incredibly popular with installers throughout the industries we serve. Immediately upon the creation of our line of PCH series Housings, it became obvious that there was also a need for higher quality steel, aluminum and stainless-steel gooseneck pedestals. The market was flooded with inferior foreign-made pedestals that looked cheap and didn't maintain their integrity or aesthetics for very long. So began our investment in quality mandrel bending machines (two to date) that produce the best gooseneck pedestals available emphasizing smooth ninety-degree bends. Every one of our products, including source materials, are 100% Made in the U.S.A. Stop feeding the foreign beast just to save a buck! Buy American!
IPS Group
7737 Kenamar Court
San Diego, CA 92121

Walker Consultants delivers cost-effective and user-friendly solutions that improve mobility and access through well-designed plans, financing, operational methods, and technology.

Whether a downtown district, commercial development, event venue, airport, hospital, university campus, or one-of-a-kind unique land use, Walker creates value for clients by performing analyses and developing plans that get people where they need to go.

Our planning and operations consultants have completed hundreds of studies, conducting thousands of hours of research. We take special care to make technological and operational recommendations that are progressive, but also realistic and implementable. Our focus is on solutions that can improve the patron's experience as well our client's operational efficiency and bottom line.

We've consulted on and designed projects nationwide and around the world, developing in-depth local knowledge of geographic markets, both domestic and international.

Our 23 offices place us within two hours of every major metropolitan area in the United States.

Walker Consultants provides planning, design, engineering, forensics, facility restoration and consulting for the built environment. Our experts have been advancing industry standards since we began in 1965. We are a 100% employee-owned company that takes pride in the value we provide our clients through integrity, honesty, and excellence.

Planning and mobility consulting from industry-leading experts

Walker Consultants sets industry standards and provides innovative, research-driven solutions for airports, event venues, hospitals, municipalities, real estate developments, transit agencies, and universities.

- Curb management and monetization
- Design for and regulation of ride apps and micro-mobility
- Parking planning (including supply/demand and financial studies) and operations
- Public/private partnerships and revenue enhancements
- Transportation demand management

info@tha-consulting.com
tha-consulting.com

THA Consulting, Inc. (Formerly known as Timothy Haahs & Associates, Inc.) (THA) is excited to announce the rebranding with new leadership! This rebranding reflects the evolution and growth of our firm, as well as our continued commitment to delivering creative, innovative parking solutions while providing exceptional client services.

THA is a multi-disciplined engineering, architectural, and mobility consulting firm. We specialize in planning—master planning for campuses, urban and high-density areas, and transit-related projects—and providing design services for parking and mixed-use buildings. THA understands the important role parking plays in development. Our approach to master planning high density and urban areas is to integrate the parking solution with a unique perspective to our clients and the pedestrian experience—creating active and vibrant “people places,” that are tailored to their environment. The team begins every engagement with the end in mind and with the approach to achieve a lasting positive impact. Our architectural and engineering design expertise rests in our ability to plan and design structures that contain a significant parking component. This specialization creates value for our clients through our considerable project experience and practical knowledge of this unique project type.

THA stands by the Mission Statement, “We exist to help those in need,” and our core values permeate everything that we do. We are committed to providing our clients with the highest level of service and will always go the “extra mile” to ensure our client’s expectations are not only met but exceeded.

WALTER P MOORE
1301 McKinney, Suite 1100
Houston, TX 77010
800.364.7300
parking@walterpmoore.com
walterpmoore.com

Walter P Moore is committed to creating synergy between our team and the owner to deliver facilities that function well, operate with ease, and provide a positive return on investment.

Our team is known for design innovation by leveraging technology to provide creative solutions to complex parking and mobility challenges.

Our team focuses on tailoring designs to the site as well as keeping the needs of the client and users in mind.

Our experts engage in a collaborative planning process to deliver creative and complete mobility solutions that assist clients in providing a premium experience.

Our diverse, hands-on operational experience of parking facilities merged with leading software technology allows us to provide clients with the most appropriate and cost-effective parking solutions to fit their needs.

We develop clear, concise, and user-friendly custom signage systems to efficiently guide vehicles and pedestrians through the parking facility.

Additionally, we leverage cutting-edge technology such as parking guidance systems to increase the utilization and efficiency of a parking facility, maximizing our client’s return on investment.

Walter P Moore’s vast design and hands-on parking operations experience equips us with the knowledge to deliver a fully integrated parking and mobility solution designed to fit within the fabric of the community and delivered within budget and on time.

Leading the Way in High-Performance Doors

For over 35 years, Rytec has been focused exclusively on design, innovation and manufacturing of high-performance doors. Market-leading parking facilities, as well as companies across a variety of industries, rely on Rytec for outstanding quality, performance and reliability.

With over 100,000 doors in operation, our doors provide security, safety and energy savings and require only minimal maintenance. We offer our customers the highest value and day in, day out performance, as well as the support, knowledge and expertise of dedicated employees, authorized dealers and trained installers throughout North America.

Residential buildings, office buildings, professional facilities—even entire cities—can benefit from the installation of Rytec high-performance, high-speed doors. Maintaining traffic security, control and efficiency are critical aspects of any successful parking operation. Our high-performance doors allow quick and controlled movement throughout facilities and commercial buildings so everyone can get to where they need to be faster and more safely. There are many advantages to choosing Rytec, not the least of which is sustaining staff and customer security while increasing productivity—along with the benefit of minimal maintenance.

ARS | EVinmotion Services is an established, nationwide service organization with more than 30-years’ experience in providing reliable and quality service to customers in a variety of industries. We at EVinmotion are committed to provide YOU, our customer, the highest on site professionally managed tech solutions to the daily challenges you face. We handle your EV Charging station needs from site survey, electrical work, charging station install, and the proper EV signage for the parking spots, along with full maintenance service after the install. With EVinmotion you get:

“From Concept To CHARGE!”

We handle your EV Charging station needs:
- Site survey
- Electrical work
- Charging station installs
- Proper EV signage for the parking spots
- Full maintenance service after the install

Don’t be left behind on the Electric Vehicle growth curve
Have you wondered why the hotel parking lot across the street seemingly has more cars than your parking lot? A factor that increasingly is being considered by potential hotel guests is the accessibility to an Electric Vehicle Charging station.

EVinmotion, through ARS Services LLC, provides entire turnkey solutions for your charging station needs. From installation of charging stations and signage, site monitoring and reporting, to maintenance and support, we take care of all your electric charging station needs, from concept to charge and beyond. Our Maintenance program ensures your new EV stations will be operational and managed 24/7. We will remotely monitor the health of your stations, notify the location of any issues, and dispatch maintenance crews for troubleshooting.
DoorKing®, Inc. (we are also known as DKS®) was established in 1948 and is one of the country’s leading manufacturers of parking control products, vehicular gate operators and access control systems.

**Parking Gate Operators & Access Control**
DKS Parking Barrier Gate Operators are designed for all types of applications; from gated communities and parking garages to hospitals and private industry, they can be customized to meet your specific application requirements. With arm options up to 27 feet in length, DK Barrier gate operators can meet any lane width requirement. These operators feature advanced electronics such as magnetic limits, UP input memory buffer, Multiple UP command memory, and DOWN memory options. Lighted arms, break-away arm options and pedestrian sensing systems further enhance the versatility of these operators. For areas requiring a higher degree of traffic control, such as airports, military installations, border crossings, industrial sites, seaports, infrastructure facilities (chemical, electrical, water treatment plants, etc.); the add-on lane barrier option provides a formidable barrier without the added expense of bollards, wedges or crash beams.

**Made in USA**
DoorKing designs, engineers and manufactures their parking gate operator products in Inglewood, CA. Local manufacturing, including solid-state circuit boards, allows DoorKing to easily and quickly adapt the product, and make changes when necessary, to meet specific application requirements.

When you partner with EiKO, you’re partnering with a dedicated resource to make lighting easy.

About Us
EiKO is your leader in the Retrofit and Renovation lighting market, supplying a broad portfolio of Parking Garage lighting products, including intelligent fixtures controls, value engineered LED fixtures and lamps while delivering best-in-class service.

Suite of Services
What sets EiKO apart from the competition? We are dedicated to our distribution partners, offering a value-added Suite of Services including lighting layout, utility rebate tracker, ROI calculator, product search and cross, in-house fixture modification program, and industry-leading warranties. We are driven to make the business of lighting easy—including our new controls ecosystem AGILITY.

The AGILITY Controls EcoSystem
AGILITY, EiKO’s controls ecosystem, offers high value, flexible controls solutions focused on application-based segmentation. AGILITY encompasses all of our controls capabilities—fixtures, devices, software—coupled with key partnerships, allowing advanced lighting control to become an easy choice with easy implementation. AGILITY is how EiKO makes controls strategies customizable and adaptable.

Our lights are everywhere you park!
LSI is a leading producer of high-performance, American-made lighting solutions for parking applications.
From municipal parking facilities to office building and factory parking lots, our outdoor area lights and parking garage luminaires are everywhere you park!
For more than 40 years, our fixtures have been illuminating parking facilities all across the United States.

Our energy-efficient, low maintenance LED parking luminaires help customers enhance safety, reduce energy costs and comply with applicable lighting codes and ordinances.
In addition, we offer wireless lighting control systems that create exceptional benefits for parking facility owners and managers.
For example, our AirLink Blue wireless outdoor lighting control system uses photocontrols and motion sensors to reduce energy consumption and comply with various energy regulations, including California’s Title 24 energy conservation requirements.
As lighting projects are developed, our Technical Services Team will use photometric design tools to develop ultra-realistic models to show you exactly how light from your fixtures will meet your needs, as well as eliminate any concerns regarding light pollution.

Parking is an important source of revenue for many cities, universities and public facilities. Parking operations managers are constantly challenged with increasing revenue, making sure all revenue collected is accounted for, increasing productivity, ensuring accountability managing, tracking collection time, data and location, and more.

What if it were possible to gain “operational intelligence” on day-to-day collection activities? How much more efficient could your parking operations be if you knew who was opening what meters and when? How much revenue loss could be prevented? What if it could be achieved simply by replacing outdated and unsecure mechanical locks?

Medeco, an ASSA ABLOY Group company, is the industry leader in high security locking systems. Medeco's Intelligent Locking Systems featuring the Nexgen Intelligent Key System, provide access control, monitoring and scheduling. The Nexgen System is made up of three elements: Nexgen electronic locks, Nexgen2 programmable keys, and web-based system management software. These elements work together to provide increased accountability and efficient route management for parking meters, collection equipment and more.

The lock itself is plug-and-play. All power comes from the key, so there is no hardwiring. Simply remove the mechanical lock and replace it with a Nexgen electronic lock.

More than just a way to protect property and revenue, Nexgen is a business tool that can lead to a substantial return on investment.

Flowbird operates in over 5,000 cities in 70 countries. Its mission is to facilitate the individual journey and maximize a city's unique mobility potential, while considering all end-user experiences. Through its devices and elite service platforms, Flowbird enables a new era for maximizing urban harmony and value throughout the city's core.

Powering the Future of Mobility, Today

The ways consumers and businesses get around is constantly evolving. Technology is shaping consumer habits, and the mobility journey. Rises in behaviors like tap-to-pay, digital payments, EV car ownerships, and micro-mobility are not trends, but permanent fixtures. These new behaviors have created a new breed of modern parkers, and they demand more.

Connecting with your customers at every point of their journey begins with digitally transforming your parking asset into a networked mobility hub, powered by FLASHOS, the industry’s only Mobility Hub Operation System.

FLASH and Arrive have partnered together to create an end-to-end digital platform to address new consumer behaviors and the growing fragmentation in the mobility landscape. This means we have combined FLASH’s parking operation OS with Arrive’s demand network, so your asset gets in front of a customer every time they are making a mobility decision.

With FLASH and Arrive’s APIs, software development kits, and ecosystem of technology partners and Integrations, we customize and connect your mobility hub, so that it answers your parker’s needs.

If you had the ability to offer real time visibility and optimization of your modern parker’s experience, wouldn’t you do it? With FLASH, we are committed to giving you every lever, every tool, and every data point to maximize your property's value.

HUB Parking Technology
BOOTH 617
761 Commonwealth Drive
Warrendale, PA 15086
844.482.7275
info.us@hubparking.com
hubparking.com

HUB Parking Technology develops smart software and mobile solutions for the parking industry, manufactures and installs PARC Systems and provides pre- and after-sales services. Innovation, not only in the technology, products and services we offer, but also in developing new approaches to entrenched business practices, is a key value of HUB.

Our latest version, and highly reliable hardware product range, Jupiter, is designed for flexibility and easy serviceability, as well as having the capability for multiple ticketless options and media types, including LPR, AVI, Proximity, and “Wave For Ticket” touchless access.

Our web-based and fully cloud-ready Janus Parking Management System (JMS), allows you to manage single and multiple parking locations with an intuitive user interface, both from an office and/or remotely with a smartphone, tablet and laptop. JMS comes as a mobile app too, to guarantee 24/7 access and monitoring of your parking facilities.

The digital transformation is running at a pace that overcomes any expectation and has become the main interface and enabler of services within urban areas, constantly innovating to better integrate with daily life and improve the user experience everywhere. Mobility gets smarter and so do HUB’s mobile and digital solutions.

J4M Validation App helps operators and merchants to quickly and easily reward customers’ purchases by turning their smartphone or tablet into a powerful validation unit, thus simplifying operations.

JPass Mobile App helps both contract and transient customers find, navigate to, reserve, enter, pay, and exit parking facilities in a touchless manner with a smartphone.

HUB’s smart, mobile and digital solutions grant customers the smooth parking process that they expect, while providing operators with the tools to better control and manage their parking facility(s), plan and increase business revenue, understand clients’ demands and easily reach, inform, and communicate with them.

T2 is the largest provider of parking and mobility solutions in North America. With over 27 years in business, T2 now serves more than 1,700 customers and maintains the largest Customer Community with nearly 7,000 active members. T2’s open technology and best practices are used to process over 2 billion US dollars annually, and the company’s PARCS, Permits, Enforcement, Pay Stations, and Professional Services capabilities are renowned for innovation and reliability.

T2 solutions help universities, municipalities, operators, healthcare campuses, and transportation hubs generate revenue and operate efficiently with integrated solutions featuring touchless and contactless options. From curbside management to LPR, from mobile payments to transportation demand management, T2 strives to make every trip a smooth journey by streamlining the parking, mobility, and transportation experience with technology solutions that help organizations manage resources, achieve goals, and empower consumers with choices.

T2 also offers industry-leading service. Not only does T2 provide the absolute best customer service it possibly can around the clock, but each T2 customer becomes part of the largest and most collaborative user community in the industry. Open discussion and constant engagement through a variety of different channels—both online and in-person—gives the T2 community the opportunity to build a better future in parking together.

Parking Today Media provides the widest circulation and coverage of any media in the parking industry worldwide. With up to 18,000 mailed each month, the magazine reaches a broad spectrum of owners, operators, municipalities, universities, airports, shopping centers and venues with parking as one of their missions. Our digital presence includes the Parking Today website, over 25,000 email addresses of those in the parking industry, our aggregator website, Parknews.biz, our online People and Products in parking (ePIP) directory, and the online edition of Parking Today.

Parknews.biz is an online aggregator of parking news from around the world. Up to 20 new links are posted daily and it receives more than 10,000 views monthly. Parkingtoday.com is the magazine’s interactive web site with archives, articles, and videos updated daily. You can reach all PTs media through parkingtoday.com. Parknews.biz, parkingtoday.com, and our weekly newsletters have a combined reach of over 30,000 people monthly.

The Parking Industry Expo (PIE) is the first parking trade show mounted annually in the US. It takes place in 2021 in Dallas, 2022 in Reno, and 2023 back in Chicago. PIE will host more than 1,500 parking industry professionals, is home to more than 150 vendors and will provide numerous seminars and training programs. For detailed schedule and information, log on to pieshow.parkingtoday.com.

This year, Parking Today magazine celebrates its 25th Anniversary. Complete information as to how to subscribe and how to log on to all PT’s media can be found at www.parkingtoday.com.

signal-tech.com

Signal-Tech is a U.S. manufacturer of LED signs and signals. We offer a complete line of LED directional parking signs, space available tower signs and the RedStorm™ Parking Guidance System with reporting software.

Our LED signs are architecturally appealing, energy-efficient, simple to install and carry an industry best warranty.

We have a wide selection of in stock signs for immediate shipment and have the expertise to customize a sign to your specifications. Our LED signs can be controlled by a wall switch, dry contact relay, or Signal-Tech’s Sign Control Software.

Through the integration of our Smart, software controlled, LED signs and RedStorm PGS, we offer a system that has the ability to count cars and report/share data while directing the flow of traffic in and around the parking facility.

LED Smart Signs are designed to change messages based on real-time parking occupancy conditions or by a preset schedule.

Our parking guidance system is ideal for a single garage or a campus setting, will adapt to new and existing garages and surface lots, and interfaces with third-party loop detection and gates.

**LED Sign Solutions for:**
- Wayfinding
- Exits & Entrances
- Cashier & Pay Stations
- End-of-Aisle Counters
- Low Clearance Areas
- Customized Messages

**Full Line of Parking Products:**
- LED Signs
- Branded Signage
- Remote Sign Control
- Overhead Clearance Bars
- Custom Space Available Tower Signs
- Parking Guidance System with Reporting Software

What We Do
For parking operators who have limited resources to manage intercom and inbound customer service calls, Parker Technology combines parking domain expertise, a flexible software platform and our professional customer service center, or your staff, to ensure customer problems are resolved efficiently, according to facility business rules.

We help our clients create a better customer experience, while collecting more revenue, keeping traffic moving, freeing up internal staff to focus on higher-priority on-site tasks, and collecting data insights to run operations more efficiently.

How We Do It
Our solution puts a virtual ambassador in every lane. When parking guests call for help, a highly-trained CSR answers within 11 seconds on average and resolves the issue in under a minute.

Our customer service representatives help guests pay and get on their way, according to your standard operating procedures. All this is done with measurable excellence, due to our quality assurance program.

Why We Do It
Automation has overtaken the parking industry. A second big change is here, and it’s all about the human touch, and the customer experience. Now, customers expect experiences that are on-par with brands like Chick-Fil-A, Hilton Hotels, and Disney.

Parking guests want to enter and exit garages without interacting with staff. But, when they need help, they want it instantly. Customer service is expected to be “everywhere and nowhere” all at once. Live help must complete the transaction to capture revenue, get the guest on their way quickly, and deliver a great experience so that the guest wants to come back. That’s where we come in.

Learn more at www.helpmeparker.com
Southland Printing Company has been part of the parking industry since 1960 and ships to all 50 states and over 49 countries. Printing tickets for over 50 different manufacturers both domestic and foreign assures you that Southland can provide the ticket you need. Only the highest quality raw materials are used, and each component undergoes rigorous testing in our R&D Lab before we release products to the market. Our shipping time is one of the best in the industry with a turnaround time of typically 20 business days after receipt of order or proof approval.

Southland Printing is a Premier Producer of print products such as Magnetic Stripe, Bar Code, QR Code, Machine Dispensed, Hand-Issued, Roll, Retail and Event Tickets for all brands and models of machine and hand issued tickets, many RFID enabled.

Whether it’s for revenue control, access or security—our excellent customer service, quick turnaround and quality products are guaranteed so you can be on your way. Southland offers over 150 STOCKED items ready for 24-hour shipment and worry-free ordering via Phone, Fax, Email or our Web Site.

Many people ask about the rose in Southland’s logo. The rose has been stylized, if you look closely you see the letters SP for Southland Printing. By looking closer you may see a roll of paper unwinding symbolizing the many rolls of paper that are used to produce the millions of tickets ran each day. A red rose has been the company’s symbol since its founding. Red is a color that has always been associated with energy, strength and power and was the perfect symbol for Southland, signifying determination as well as passion.

Although Southland has made some changes, they still hold their Core Values of Relationships, Integrity, Quality, Versatility and Communication in high regard! These will never change.
Toledo Ticket Technologies is your leader in hybrid ticketing solutions to the parking industry that are efficient, flexible and keep businesses running smoothly.

Our Oobeo platform offers a full suite of app free contactless cloud-based parking software options which include valet, pay-by-space, permits, and events.

The company is known for quality manufacturing of tickets of every description, including bar-coded tickets, magnetic-striped tickets, machine and hand-issued, multi-part valet, pay and display, pay-by-space, and spitter tickets for thermal/nonthermal revenue control.

Toledo Ticket Technologies also specializes in RFID tags and credentials for colleges and universities, municipal, healthcare, government, institutional and private parking operations to improve security, convenience, meet green mandates, all in a cost-effective manner.

Toledo Ticket Technologies is certified by most parking equipment manufacturers and provides products in all 50 states and more than 30 countries.

The company was the first in the United States to manufacture bar-coded parking tickets, and now produces more than 1 billion tickets annually.

Started in 1910 by Grant F. Northrup, Toledo Ticket has enjoyed five generations of leadership since its founding. With nearly 50 employees, and multiple manufacturing plants and sales offices around the world, Toledo Ticket serves nearly 10,000 customers worldwide.

abm.com/parking

ABM Parking Services supports a wide range of off-street and on-street parking facilities across more than 2,000 client locations, including some of the largest and most prestigious buildings in the United States. Clients rely on ABM for best practices in operations and maintenance to elevate their overall guest experience while operating at peak safety, efficiency and profitability.

As an industry leader, ABM has teams identifying and prototyping new technologies and systems to optimize parking operations and revenue. Our dedicated team of experts delivers reliable, professional service with a focus on compliance and best practices.

As the pandemic enters its next phases, more people will be returning to their workplaces and garages will be filling up again. ABM’s parking expertise delivers specialized expertise, scale and readiness plans to reopen your facility in a way that helps establish and maintain safe, well-managed spaces for your occupants. From facility parking management to shuttle service and valet, ABM constantly calibrates to the needs and size of your facility to deliver consistent, high-value results.

ABM teams are ready to help you accelerate and optimize your business with comprehensive solutions to elevate customer experience, operations and revenue. Learn more about ABM Parking Services at ABM.com/Parking. Or contact our team of experts at 866.624.1520.

“Impressions Perfected”*
Advanced Parking Concepts (APC) is the New York area leader providing parking and related hospitality services throughout the metro region. APC established, and has been in the forefront, of executing best practices for COVID-19 safety/hygiene protocols.

By virtue of our extensive experience and training, our dedicated team represents a best-in-class approach to every relationship and client which we define as “The APC Way.”

This unique combination of extraordinary service, state of the art technology, professional management and a unique understanding of logistics elevates our industry to an art.

Our suite of integrated services includes Valet Parking, Parking Management, Consulting, Concierge, Shuttle, Greeter, Directed Assisted Parking, and Event Service.

We stand as true partners with premier real estate, health care organizations, hotel, university, corporate, luxury brands and event organizers to elevate every experience.

Whether your service needs are as an amenity or necessity, APC will meet & exceed your expectations!
LAZ Parking
One Financial Plaza, 14th Floor
Hartford, CT 06103
860.522.7641
laz@lazparking.com
lazparking.com

LAZ Parking is a parking management, transportation and mobility company founded in 1981 by three childhood friends. Over four decades later, the combination of lifelong friendship, a people-focused philosophy, and a mission to “create opportunities for employees and value for our clients” has transformed LAZ from a single valet location to one of the nation’s largest parking companies.

In 1981, our first year of operating the Hilton Hotel in Hartford, we improved the net operating income by 50%. More than three decades later, the results are still the same—increased profitability and better service. Each of our many regional offices are headed by officers of the company. This allows LAZ to offer its clients the resources of a large company with the attention and responsiveness more typical of a local company.

At LAZ, we understand the future of parking isn’t just about stopping and parking. It’s about mobility and technology. For us, the global shift from parking to mobility isn’t a problem—it’s an enormous opportunity. Our Technology team works hard to ensure that LAZ will continue to be the leader in parking technology for many years into the future.

Today, LAZ operates over one million spaces at over 3,125 locations in 441 cities across the United States in the following markets: hospitality and valet, office buildings, medical and hospital, airport and transportation, campus, government and municipal, retail and mixed-use, event parking, residential buildings and shuttle services.

If you’d like to learn more about LAZ Parking, please visit www.lazparking.com.

*NPA INDUSTRY PARTNER*
FULL-SERVICE PARKING MANAGEMENT

When you think PARKING, think PLATINUM.

Founded in 2000, we are headquartered in downtown Dallas, Texas.

We offer clients the depth and resources of a large company but with the attention and responsiveness of a small entrepreneur. This hands-on style of operating means that we are looking out for our client’s best interest and bring solutions to the attention of our clients before they become problems.

Platinum Parking has over 60,000 parking spaces under contract in a portfolio. Our services include Class A office buildings, mixed use projects, residential properties, stand-alone garages, surface lots, valet, event parking, and consulting services.

Our team is what sets us apart from other parking operators. Our management team has more than 150 years of combined parking experience.

Platinum Parking has a reputation for offering superior service to our customers and clients and is well known for employing leading edge technology in parking solutions.

SP+

SP+ facilitates the efficient movement of people, vehicles and personal belongings with the goal of enhancing the consumer experience while improving bottom line results for our clients. The Company provides professional parking management, ground transportation, remote baggage check-in and handling, facility maintenance, security, event logistics, and other technology-driven mobility solutions to aviation, commercial, hospitality, healthcare and government clients across North America.

Our commitment to Innovation in Operation® has made us an industry leader in delivering advanced capabilities to support our clients’ expanding performance and financial needs. Not only can we provide exceptional market-based expertise in each of our service lines, we utilize the latest in advanced technologies and marketing strategies, and have taken new innovative approaches supporting revenue management to maximize the performance of our clients’ businesses.
