

Spirometer

RESPIREX® EasyOne™ Spirometers

The RESPIREX® EasyOne™ Spirometer is a simple and easy-to-use apparatus designed to make lung function testing fast and reliable. This highly portable instrument can be used for a point-of-care testing or bedside monitoring; and is ideal for physician's offices, hospitals and long term care facilities.

Features and Benefits

- TrueFlow™ technology ensures high accuracy of the results
- LCD display and alpha-numeric keypad make the device easy-to-use
- EasyOne™ screen provides live graphs for easier result reading
- Direct printing and PC connection possibilities allow for different report options
- No calibration, maintenance or down time ensure low operating costs
- Long lasting batteries are good for approximately 400 tests
- 3-year exchange warranty

Reorder #785

MFG#	Item Description	Additional Features	UOM
785	EasyOne™ Spirometer System	Spirometer and cradle; printer is not included	1 ea/cs
786	EasyOne™ Spirometer	Spirometer only. Cradle and printer are not included	1 ea/cs

Calibration Syringe

In addition to the spirometer and accessories, we also offer a Calibration Syringe in our SELECT® brand. This 3 liter syringe is specially designed to ensure the validity of testing results. It is a reliable precision tool for quick and easy verification of pulmonary testing equipment. Capacity and accuracy meet ATS/ERS recommendations. The product is latex free to avoid allergic reactions and to help ensure caregiver and patient safety.
