

# 2019 WCA FALL CONVENTION

**SEPTEMBER 26 - SEPTEMBER 29**  
Kalahari Resort, Wisconsin Dells

[www.wichiro.org/conv\\_fall](http://www.wichiro.org/conv_fall)

### Fall Convention Lodging

A block of rooms is available at Kalahari Resort & Convention Center until August 26.

Call Kalahari at 877-253-5466 to book your room and be sure to mention Wisconsin Chiropractic Association.

Kalahari	Wed/ Thurs	Fri / Sat
Standard Room	\$109 .....	\$149
Lodge Suite	\$139 .....	\$179
2 Room Family Suite	\$179 .....	\$219
Royal African Queen	\$199 .....	\$239

\*Rates include waterpark passes

## Fall Convention Seminars Thu Sept 26

### The ABCs of PI – 12 CE DC

Every chiropractor will eventually have to deal with a patient who has been injured in a motor vehicle collision. Even for those who choose not to have a personal injury practice it is important to have a better understanding of the basic requirements for a Personal Injury case.

This 12 hour module will review all the steps to be followed for PI cases, and teach providers the tools and processes to properly document motor vehicle injuries, to communicate with other providers, and meet the needs of attorneys and insurance companies.

**Thu Sept 26, 8:00 am - 5:00 pm** (1-hour lunch break)  
**Friday Sept 27, 1:30 pm – 5:30 pm**

Instructor: William P. Gallagher, Jr., DC, CMVI, CME, PLC  
Sponsored by American Academy of Motor Vehicle Injuries

### Revolutionary Wellness: A Functional Approach To Health – 8 CE DC/4 Nutrition

Dr. Robert Silverman leads you through an innovative demonstration showcasing the power of performance nutrition and conservative therapies on health and movement patterns. Utilizing interactive how-to's, he demonstrates a functional approach to improved performance and recovery that includes diet, nutrition supplementation, laser therapy, functional movement assessment, corrective exercises and more. Understand how to apply neurodynamic tests and corrective laser protocols. Discover effective assessment, rehabilitation and nutritional strategies for the management of musculoskeletal injuries and disorders. Assess and understand traumatic brain injuries (concussion, neurodegenerative diseases), review the pathogenesis of cumulative trauma disorders. Expect to leave with hands-on reproducible, implementable protocols for your practice success.

**Thu Sept 26, 8:00 am - 5:00 pm** (1-hour lunch break)

Instructor: Robert G. Silverman, DC, DACBN, DCBCN, MS, CCN, CNS, CSCS, CIISN, CKTP, CES, HKC, FAKTR  
Sponsored by Erchonia

# Fall Convention Seminars **Fri Sept 27**

## **Hacking the Chiropractic Profession: The Technology Adjustment – 2 CE DC/CT**

### **NEW AT FALL CONVENTION:**

**Join us for an opening general session!**

Dr. Jay Greenstein will engage us with his energetic, dynamic style as he shares information on rapidly evolving technologies and their potential impact on Chiropractic - both positive and negative.

We are living in an unprecedented time of massive change. Rapidly evolving technologies – artificial intelligence, deep machine learning, blockchain, cloud computing, the Internet of Things (IoT), 3-D printing, genomics, mobile health technologies, wearables, telehealth, big data and more, are coming together synchronously creating a perfect storm of massive disruption. We must be part of the conversation, and more importantly, part of the technological advancement through application and innovation.

This session will present an overview of technologies, their implication to the chiropractic profession and the patients we serve, and lay out a recommended action plan for our future.

### **Fri Sept 27, 1 8:00 am - 10:00 am Opening General Session**

JAY GREENSTEIN, DC, CKTP, CGFI received his DC degree from the National College of Chiropractic and earned his post-graduate degree in Sports Chiropractic at Logan College of Chiropractic. Dr. Greenstein has published extensively and presented numerous original research papers at scientific symposiums throughout the world. In addition to maintaining his private practice as CEO of Sport and Spine Rehab and Sport and Spine Athletics, he is the founder and President of the Sport and Spine Rehab Clinical Research Foundation. Dr. Greenstein represents chiropractic at numerous state and national-level policy advisory committees. He has worked diligently throughout his career as an influencer to ensure chiropractic access with healthcare reform taking place at the state and national level. He is the recipient of many awards, serves on multiple community and business advisory boards in healthcare, banking and information technology, and lectures worldwide on topics of sports chiropractic, rehabilitation, business development, and personal and professional growth. He believes strongly in empowering patients to improve the quality of their lives.

## **HIPAA Compliance – 6 CE DC/CT**

Be certain that you and your staff understand the required written security policies that must be in place to ensure your clinic is HIPAA Compliant. Understand the very real threat of Ransom Ware attacks, cyber-attacks and other forms of patient information breaches. Take away concrete steps to establish a HIPAA program and develop an ongoing program to keep everything current.

**Fri Sept 27, 10:30 am - 5:30 pm** (1-hour lunch break)

Instructor: Ty Talcott, DC

Sponsored by ChiroHealthUSA

## **Addressing the Underlying Causes of Fatigue: Digging Deeper for Clinical Solutions**

### **Part I: Finding & Addressing the Fundamental Causes of Fatigue – 12 CE DC/4 Nutrition**

Fatigue, a common symptom seen by clinicians every day, presents a clinical dilemma because there are so many possible underlying causes.

This seminar will provide the clinician with a step-by-step guide to determine and address the most common underlying causes of fatigue, including nutritional imbalance, adrenal fatigue, mitochondrial dysfunction, inflammation, gastrointestinal imbalances, insulin resistance, thyroid imbalances and medications.

Specific protocols, including testing and test interpretation; dietary and supplemental recommendations; and lifestyle therapies to address each underlying imbalance will be explained so that each provider has the tools they need to design and implement a plan of action that can help their patients correct and eliminate their underlying causes of fatigue.

Many case studies will be presented to help the practitioner understand how to implement these strategies in practice so that providers are ready to go when they get back to the office. In addition, we will review techniques on how to structure office visits and manage patient flow to maximize results and income.

**Fri Sept 27, 10:30 am - 5:30 pm** (1-hour lunch break)

**Sat Sept 28, 8:00 am - 3:00 pm** (1-hour lunch break)

Instructor: Chad Oler, ND

Sponsored by NutriDyn

## Fall Convention Seminars **Fri Sept 27**

### **Today's Chiropractor: Expert Clinician and CEO – 2 CE DC**

In today's healthcare environment, there is more data and research than ever that supports chiropractic care. This course will teach you how to use the latest research evidence to educate your patients, communicate medical necessity to payers, ensure coordinated care with healthcare providers, and improve safety and patient compliance. If you want to create an even greater impact for your community, this is a go-to course.

**Fri Sept 27, 10:30 am - 12:30 pm**

Instructor: Jay Greenstein, DC, CKTP, CGFI  
Sponsored by ChiroHealthUSA

### **Evaluation and Management Coding**

**- 2 CE DC/CT**

While it seems simple, there are three different rule systems that govern evaluation and management codes, and of course, your documentation must reflect the codes. Increase your compliance and income by coding correctly. This course is intended for both DCs and Staff.

**Fri Sept 27, 10:30 am - 12:30 pm**

Instructor: Jeff Wilder, DC, FACO, CCSP, FICC

### **Revolutionary Wellness: Gut-To-Brain Axis in Health – 2 CE DC/2 Nutrition**

The brain is the most nutrient-dependent, energy-dependent and stress-vulnerable organ in the body. Research surrounding the connections between Gut and Brain has experienced significant growth recently in the areas of incidence, assessment and recovery. Attendees will gain valuable strategies to assess and understand traumatic brain injuries, initiate the positive impact of gut health on the musculoskeletal system, review the pathogenesis of cumulative trauma disorders and expertly assess intestinal and blood-brain dysfunctions. Plan to leave with implementable gut-to-brain protocols for Monday morning.

**Fri Sept 27, 10:30 am - 12:30 pm**

Instructor: Robert G. Silverman, DC, DACBN, DCBCN, MS, CCN, CNS, CSCS, CIISN, CKTP, CES, HKC, FAKTR

Sponsored by Erchonia

### **Biomechanics, Imaging and Care of the Active Patient – 4 CE DC**

Learn step-by-step how to perform a biomechanical exam. Understand cause vs. symptom relief and biomechanical model vs. medical model. Discover the importance of biomechanical x-rays and how to interpret them.

**Fri Sept 27, 1:30 pm - 5:30 pm**

Instructor: Mark N. Charrette, DC  
Sponsored by Foot Levelers

### **The ABCs of PI (continued)**

see page 7 for description.

**Fri Sept 27, 1:30 pm - 5:30 pm**

### **Stroke: The Truth Shall Set You Free**

**– 2 CE DC**

Attendees will come away with a better understanding of this malady, the truth behind the real numbers of incidence, how chiropractors can minimize the occurrence, and how to address this issue with patients and other healthcare providers.

**Fri Sept 27, 1:30 pm - 3:30 pm**

Instructor: Jeff Mackey, DC, FACO, FICC  
Sponsored by Bioposture Mattress Company

### **High Velocity Low Amplitude (HVLA) Manipulation: Current Research and Information – 2 CE DC**

Join Dr. Jeff Mackey to gain a better understanding of the science behind what we do, explore key strategies in risk management and malpractice avoidance and develop ways to promote the chiropractic profession.

**Fri Sept 27, 3:30 pm - 5:30 pm**

Instructor: Jeff Mackey, DC, FACO, FICC  
Sponsored by Bioposture Mattress Company

## Fall Convention Seminars Sat Sept 28

### Addressing the Underlying Causes of Fatigue (continued)

see page 8 for description.

**Sat Sept 28, 8:00 am - 3:00 pm** (1-hour lunch break)

### Impairment Rating: Updates and Recertification – 12 CE DC

The AMA Guides to the Evaluation of Permanent Impairment 6th edition defines an innovative new international standard for impairment assessment.

The goal of the AMA guidelines was to provide an impairment rating guide that is authoritative, fair, and equitable to all parties. A methodology was adopted and applied to each chapter to enhance the relevancy of impairment ratings, improve internal consistency, promote greater precision, and standardize the rating process. It is hoped that the new edition will prove to be a benefit to chiropractic providers/examiners by minimizing inter-chapter conflict and improving decision-making.

Approved for recertification for those currently certified by the American Board of Forensic Professionals (ABFP) this course is appropriate for anyone wanting more background in Impairment Rating. In these days of struggling reimbursements, the additional revenue stream of an expert witness practice is even more important.

**Sat Sept 28, 8:00 am - 5:00 pm** (1-hour lunch break)  
**Sun Sept 29, 8:00 am - 12:00 pm**

Instructor: Steven G. Yeomans, DC, FACO

### Diagnostic Imaging of the Spine and Extremities - 4 CE DC

Attendees will be presented with a wide variety of diagnostic imaging case studies, including radiographs and advanced imaging. The discussion will include information related to clinical imaging correlations, as well as specific imaging findings. There will also be discussion of important factors regarding imaging decision-making, technical factors/quality assurance and related topics.

**Sat Sept 28, 8:00 am - 12:00 pm**

Instructor: Michelle Mick, DC, DACBR, DipMED

Sponsored by CDI

### Avoiding Expensive Documentation Mistakes – 4 CE DC/CT

Dr. Gwilliam, Clinical Director for PayDC EHR Software, certified coder and auditor, will teach you how to avoid the most expensive documentation mistakes that DCs make, including cloning and creating lousy care plans. He will demystify the confusion around where auditors and reviewers find the rules that they apply when looking at your records. Discover ways to easily satisfy documentation requirements so that you can get back to taking care of patients.

**Sat Sept 28, 8:00 am - 12:00 pm**

Instructor: Evan M. Gwilliam, DC MBA BS CPC CCPC CPC-I  
QCC MCS-P CPMA CMHP AAPC fellow

Sponsored by PayDC and Infindi

### Hemp: Exploring the Endocannabinoid System in Health & Disease

– 4 CE DC / 4 Nutrition

One of the most important medical achievements in recent history has been the discovery of the Endocannabinoid System (ECS) - an intricate network of receptors and signaling molecules (endocannabinoids) found throughout the body. From a global perspective, the ECS is focused on maintaining overall health, balance and wellbeing (homeostasis) and may be viewed as a master adaptogenic system that is involved in all physiological functioning in the body.

Research has demonstrated the ECS is intimately involved in our metabolism, neurological, cardiovascular, respiratory, gastrointestinal, and musculoskeletal systems as well as modulating communication among organs. While our bodies naturally produce internal cannabinoids (endocannabinoids) that influence various receptors, deficiency states do exist and are linked to numerous conditions influenced by inflammation, stress, anxiety and brain health. The good news is that many of these conditions respond to plant based phytocannabinoids and hemp is the major source.

This lecture provides a glimpse into this critically important and ignored physiological system and the clinical relevance of hemp-based phytocannabinoids.

**Sat Sept 28, 8:00 am - 12:00 pm**

Instructor: Carl Germano, CNS, CDN

Sponsored by Standard Process

## Fall Convention Seminars Sat Sept 28

### Chiropractic Treatment Options for TMJ Disorders – 4 CE DC

The National Institute of Dental and Craniofacial Research reports that as many as 10 million people have TMJ disorders, often presenting with other conditions such as headaches, neck pain, chronic fatigue syndrome, fibromyalgia, IBS, and other systemic illnesses.

This 4-hour program will provide the doctor with practical information and techniques specific to TMJ Disorders that can be integrated into even a busy practice the following day. Advanced therapeutic applications, including laser therapy and adjusting techniques, will be highlighted.

**Sat Sept 28, 8:00 am - 12:00 pm**

Instructor: Dr. Wendy Varish, DC, FACO, CCSP, CCOHC, MCS-P  
Sponsored by Power Medic Lasers

### Common Subluxation Patterns and Adjustments for Lower Extremities

– 8 CE DC

Dr. Charrette examines the basic neurology of extremity adjusting and introduces the benefit of utilizing indicators to adjust extremity articulations as opposed to symptomatology.

Using the concept of “The Noisy Joint,” the use of motion x-rays and video demonstrations, the adjustments for the typical pronated foot will be taught, including the navicular, cuboid, cuneiforms, talus, calcaneus and fibular head. Indicators, listings and adjustments for the knee and hip will be presented along with targeted rehab exercise. The wrist extension thrust technique will be covered in detail so participants will be able to duplicate the results.

Expect a workshop/hands-on format utilizing multiple repetitions. You’ll leave with effective adjustments you can implement immediately that will increase positive outcomes for your patients.

**Sat Sept 28, 8:00 am - 5:00 pm** (1-hour lunch break)

Instructor: Mark N. Charrette, DC  
Sponsored by Foot Levelers

### Compression Band Flossing – 2 CE DC

This course introduces the concept of skin/fascial/nerve gliding to help reduce tissue swelling, improve movement and modulate pain with the use of ‘compression band floss.’ This course will cover the anatomy, physiology and neurology of the effects of compression band flossing on connective tissue gliding, tissue traction and tissue compression. Interventions with compression band floss (including direction and pressure concepts) will be reviewed and integrated into current rehabilitative concepts. Intended for practitioners and therapists with a basic understanding of soft tissue techniques. Compression bands will be supplied to each attendee to use during the course. Participants should present with comfortable clothing to allow for a hands-on workshop experience.

**Sat Sept 28, 1:00 pm - 3:00 pm**

Instructor: Beth Rizer, DC  
Sponsored by Rocktape

### Chiropractic Treatment Options for Common Shoulder Conditions – 4 CE DC

You have a busy office. You have learned great techniques for treatments at other seminars, but sometimes the time it takes to implement these techniques is just not practical. From rotator cuff conditions to frozen shoulder, this 4-hour program will provide the doctor with comprehensive treatment options that can be realistically applied within a busy office. Advanced therapeutic applications, including laser therapy and adjusting techniques, will be highlighted.

**Sat Sept 28, 1:00 pm – 5:00 pm**

Instructor: Dr. Wendy Varish, DC, FACO, CCSP, CCOHC, MCS-P  
Sponsored by Power Medic Lasers

### Chiropractic CPT and ICD-10 Coding for Dummies – 4 CE DC/CT

Many of us find coding rules and guidelines a bit daunting. Dr. Gwilliam has already waded through them. Let him help you get them figured out! Leave this presentation with the peace of mind that you are doing things correctly.

**Sat Sept 28, 1:00 pm - 5:00 pm**

Instructor: Evan M. Gwilliam, DC, MBA, BS, CPC, CCPC, CPC-I, QCC, MCS-P, CPMA, CMHP, AAPC, Fellow  
Sponsored by PayDC and ChiroHealthUSA

## Fall Convention Seminars Sat Sept 28

### Informed Consent and Patient Safety

– 2 CE DC

This can be a confusing topic for DCs. What is required? What is best practice? What keeps them out of court? Protect your practice by being informed. Dr. Wilder is an expert in this topic, with many years of experience sharing his expertise in the courtroom, legislature and classroom. Attendees will leave confident they understand the background literature and have mastered the requirements.

**Sat Sept 28, 3:00 pm - 5:00 pm**

Instructor: Jeff Wilder, DC, FACO, CCSP, FICC

### Myofascial Cupping – 2 CE DC

This course introduces the concept of skin/fascial decompression to help improve tissue mobility, improve movement and modulate pain with the use of myofascial cups. This course will cover the anatomy, physiology and neurology of the effects of myofascial cupping on connective tissue gliding, tissue traction and tissue decompression. Interventions with myofascial cupping will be reviewed based on the literature and integrated into current rehabilitative concepts. Intended for practitioners and therapists with a basic understanding of soft tissue techniques. A myofascial cupping set will be provided for attendees to use during the class. Participants should present with comfortable clothing to allow for a hands-on workshop experience.

**Sat Sept 28, 3:00 pm - 5:00 pm**

Instructor: Beth Rizer, DC

Sponsored by Rocktape

## Fall Convention Seminars Sun Sept 29

### Light Therapy & Cold Laser for CTs

– 4 CE CT

This 4-hour course will introduce chiropractic technicians to the concepts of light and its therapeutic applications.

**Sun Sept 29, 8:00 am - 12:00 pm**

Instructor: Dr. Wendy Varish, DC, FACO, CCSP, CCOHC, MCS-P

Sponsored by Turowski Health Care Products

### Impairment Rating (continued)

see page 10 for description.

**Sun Sept 29 8:00 am - 12:00 pm**

### IASTM Redefined: Basic Gentle Soft Tissue Techniques for Your Patient Care – 4 CE DC

The concept of movement therapy and performance enhancement via Instrument Assisted Soft Tissue Mobilization (IASTM) will be introduced. The tools may be hard-edged, but the techniques don't need to be aggressive to deliver superior patient outcomes.

A review of dysfunctional movement screening patterns and the utilization of soft tissue tools to improve patient outcomes is covered along with a review of anatomy, physiology and neurology of myofascial soft tissue work. IASTM intervention strategies will be combined with kinesiology taping to deliver a comprehensive approach to patient care.

This hands-on workshop environment is intended for practitioners and therapists with all levels of experience with soft tissue techniques.

**Sun Sept 29 8:00 am - 12:00 pm**

Instructor: Beth Rizer, DC

Sponsored by Rocktape

# WCA FALL CONVENTION REGISTRATION

Mail: WCA, 2401 American Ln, Madison, WI 53704 Email: registration@wichiro.org
