COURSE OVERVIEW This class is a progressive level providing advanced training for DCs and for CTs who currently have the Exercise Rehab endorsement. This allows CTs to continue to learn concepts and advance their skills beyond the required material. CTs are **REQUIRED** to have the current licensure in the Exercise Rehab modality in order to attend.

At the end of this class, participants will: 1) be able to identify common structures of anatomy and normal movements (range of motion) of the lower extremities; 2) be able to evaluate the hip, knee and ankle for functional deficits, using movement screens; 3) understand a guided problem solving approach to treatments; 4) use prognostic values for objective goal setting for patients; be prepared to add in active care into their practice.

INSTRUCTOR: Dr. Eric Kirk, DC, DACO
