COURSE OVERVIEWS

Evolution of Chiropractic - 4 CE DC

Medical forecasts for low back and cervical surgeries are estimated to increase 300% by year 2030. Cervical artificial disc replacement surgeries are expected to increase 125%. Older females have a 97% chance of receiving an artificial hip or knee replacement. All these surgical procedures create movement dysfunctions associated with post surgical pain syndromes that respond to chiropractic care. There are chiropractic manipulative strategies that help this population of patients function at a higher level of performance and once again become more productive in society. The purpose of this course is to teach chiropractic manipulative skills that do not compromise the co-morbidities that can develop with age. Protecspine will supply a zero-gravity unit for demonstration purposes during the course.

Focused Nutrition and Adjunctive Therapies for Pain Management 4 CE DC/4 Nutrition:

This 4 hour class is part of the Clinical Pearls series that gives a chiropractor a wealth of educational and practical information on a particular topic that can be taken back to the office and utilized in practice the next day. This module will concentrate on acute and chronic pain – conditions that are seen in an office on a daily basis. Nutritional protocols, adjunctive treatments, and current research and science to support the doctor's recommendations will highlight the "clinical pearls" that the doctor can integrate immediately within the office.

LOCATIONS/LODGING

Please note, this course takes place in two different locations.

ABOUT OUR SPEAKERS

Dr. Laney Nelson DC, DACBSP is from Utah where he was in clinical practice for 25 years prior to becoming the director of sports medicine at Logan University. During this time he also served as the team chiropractor for Brigham Young University, the Utah Grizzlies Professional Hockey Club, Salt Lake Sting and Salt Lake Buzz. He served as the director of the Bio Freeze Sports and Rehabilitation at Logan College of Chiropractic from 2005 until 2013 where he was instrumental in developing the sports medicine curriculum. He has participated in numerous national and regional track & field championships as well as developing integrated chiropractic procedures for numerous university sports medicine programs. The American Academy of Chiropractic Sports Physicians selected him as the 2011 Chiropractic Sports Physician of the year. He was awarded the John N. Nash research award in 2013.

Dr. Nelson has extensive international and national lecturing experience with many different programs and associations. His specialty is in the management of post surgical back pain and failed back syndrome.

Dr. Wendy Varish, DC, CCSP, CCOHC, MCS-P is a graduate of the National College of Chiropractic in Lombard, Illinois. She has served on numerous committees for chiropractic-related issues and has created and presented variety of educational courses and training workshops for DCs and their staff. Dr. Varish is currently in professional practice in Howards Grove.
