WOMEN'S  
SOCIETY OF  
CYBERJUTSU

Empowering Women and Girls in Cybersecurity Careers since '12

EMPOWER | NETWORK | LEAD

## LET'S CHANGE THESE NUMBERS

**1.8 million unfilled cybersecurity jobs by 2022**

In 2020, the **Women's Society of Cyberjutsu (WSC)** enters its seventh year dedicated to raising awareness of cybersecurity career opportunities and advancement for women in the field, closing the gender gap and the overall workforce gap in information security roles. Serving seasoned cybersecurity veterans, IT professionals at the start of their career, or those looking for a change in profession, **WSC's** community of women supports its membership—over 2,500 strong including students, veterans, “boomerangs,” and active cybersecurity professionals—for every step of their journey.

## WSC's Mission

# Creating a network of women and girls that help each other succeed in cybersecurity

**Training:** technical and “core” skills and study groups

**Competitions:** training for competitions, the formation of women- and girls-only teams, and hosting competitions

**Mentoring:** a network of mentors to assist WSC members in maneuvering the many facets of cybersecurity careers

**Volunteering:** opportunities for volunteers to both share their skills with members and to gain valuable networking and work experience themselves

**Job Placement:** working directly with employers across all industry sectors to match qualified female and minority candidates with positions

**Partnerships:** with employers, universities and other organizations to raise awareness and educate women and girls

## WHAT WSC DOES

**WSC** provides its members a range of resources to develop skills, advance their careers and find rewarding employment opportunities, including **training, mentoring, volunteering, job placement assistance and partnerships** that raise awareness and promote education and job opportunities. Some of our unique features include hosting career conversation webinars with lessons from successful women in cyber, competition training and women-only competitions that participants proclaim are both inspirational and a lot of fun!

## CYBERJUTSU GIRLS ACADEMY

Presenting careers in cybersecurity to women must begin in the classroom, and WSC embodies the importance of encouraging girls to embrace STEM-related education and professions. WSC founded the Cyberjutsu Girls Academy (CGA) to deliver a unique, hands-on curriculum to girls across the nation with a focus on securing information technology.

## HOW CAN YOU GET INVOLVED WITH WSC?

There are numerous opportunities for you to become a valuable contributor to WSC's mission as we continue to expand our organization, create new chapters, grow our membership and change the balance of women in cybersecurity professions in a real, measurable way. We welcome leadership, expertise, human resources, facilities, and investment.

## WSC SPONSORSHIPS

WSC welcomes a variety of sponsorships, including sustaining sponsors, event sponsors and other custom sponsorship opportunities that provide your organization both with marketing and branding opportunities and with a platform before our growing membership of cybersecurity professionals. Your financial investment, time, and facilities are all needed and appreciated to help us grow.
