

ARE YOU READY FOR THE NEXT REVOLUTION?

To avoid being left behind, we need to prepare for this future now
Yours is the voice of the future, shaping the way through AEA

The Industrial Revolution which started in the 1700's may be considered one of the most important events in the history of humanity since the domestication of animals and plants.

Mankind is experiencing a new revolution – the fourth industrial revolution - the cyber revolution and the

emergence of artificial intelligence (AI).

AI is the newest, some say, most influential technology advancement currently affecting everything and everyone in the digital world. Developers and companies around the world are engineering new ways to implement some machine-learning-based function in every software, platform and tool out there.

To avoid being left behind, we need to prepare for this future now.

Join us at the 39th American Escrow Association
Annual Education Conference
June 21 – 22, 2019
Westin Hotel | Long Beach, California
