SIF Implementation Support Tools

Updated: May 2019

The Access 4 Learning (A4L) Community is proud to provide this suite of valuable tools for schools, districts, states and local authorities to help them begin and continue working toward data interoperability and automated vertical reporting. These tools, along with the other available online resources from A4L, empowers end-users to implement data interoperability solutions via gap analysis development, project planning, RFP access and documented best practice strategies.

➢ **RFP Language**
  - [https://www.a4l.org/page/EUWhyCHooseSIF#ImpToolkit](https://www.a4l.org/page/EUWhyCHooseSIF#ImpToolkit)
    - SIF has been designed to put YOU in charge of your data management needs and ensure marketplace products address those needs – but you must demand it!

➢ **SIF Implementation Readiness Assessment Survey**
  - [https://www.a4l.org/page/EUWhyCHooseSIF#ImpToolkit](https://www.a4l.org/page/EUWhyCHooseSIF#ImpToolkit)
    - Designed to measure individual perceptions about your school/district’s readiness for a data integration initiative
    - The "value-add" is an editable output document that includes assessment and next steps for interoperability planning.
    - The document can be integrated as a piece of your technology plan and offer insight in where you are in gaining data interoperability.

➢ **SIF Implementation Planning Kit**
  - [https://www.a4l.org/page/EUWhyCHooseSIF#ImpToolkit](https://www.a4l.org/page/EUWhyCHooseSIF#ImpToolkit)
    - These SIF Planning Toolkits provide advice and guidance on Project Planning; Data management; Computer hardware, software, networking; budgetary and human resource concerns.
    - This planning kit was designed by and for educators to provide processes for getting the best possible technology solution for their school and/or district/local authority’s data interoperability.

➢ **SIF Certification Register**
  - [https://www.a4l.org/page/SIFCertRegistry](https://www.a4l.org/page/SIFCertRegistry)
    - The SIF Certification Program is a voluntary program of the A4L Community open to any product meeting the conformance testing requirements. The certification registry provides tested product's conformance SIF Implementation Support Tools.

It is the hope of the A4L Community that by providing you access to these valuable tools you will gain greater interoperability knowledge as you work towards an integrated SIF Solution.
