Privacy and Interoperability Sponsorship

Is your organization ready to be “front and center” of the fastest growing global educational non-profit community with thousands of potential customers?

In conjunction with April CoSN meetings, the Student Data Privacy Consortium (SDPC) and the Future of Privacy Forum (FPF), with the Access 4 Learning Community, will be hosting two days of “tactical” data interoperability and privacy conversations with real-world work products.

Audience: These sessions will be held in conjunction with CoSN Annual Meetings and will include a partnership “privacy boot camp” with our partners from Future of Privacy Forum – the leading organization informing federal, state and local leaders on educational policies and legislation.

These successful boot camps have been held across the country to rave reviews from administrators, policymakers, marketplace providers, CIO’s and teachers. Teaming with the SDPC, this boot camp will be linked to the technical work of the larger A4L Community to successfully enable interoperability while increasing the controls over student data. Attendance numbers for the meetings will be 100 over two days.

Student Data Privacy Consortium
