

STUDENT PRIVACY BOOT CAMP

REGISTER TODAY!

Join the Future of Privacy Forum and the Student Data Privacy Consortium as they provide a **free** 'Student Privacy Boot Camp' for districts.

Are you comfortable in all aspects of student privacy in your role in the classroom, overseeing data management, reporting and communications?

Need some immediate 'tactical' data privacy suggestions and/or tools that you can use immediately when you get back to your school?

This interactive event will outline the various privacy considerations for your role, privacy resources, and strategies that you could easily employ to protect students and link you to an international network of practitioners that are doing the same each day – just like you!
