With that in mind, this session has a **two-fold** purpose: first, to allow panel members to present information on clinical and experiential initiatives they have been a part of or originated, along with the nuts and bolts of how these experiential processes have worked and *haven't* worked. Second, the session is meant to allow, encourage, and promote a "brainstorming" session for attendees; what have you done/seen in the area of experiential clinical learning that has worked, that hasn't worked, that is valuable or not so valuable, and how to bring the necessary constituencies -- other academic departments and schools at our institutions, the greater legal community, and regulatory authority -- into the discussion and creation process.
