About AAHFN-CB

Offering basic heart failure certification was initiated by the original AAHFN Board of Directors in 2004 and was a personal goal of the 13 individuals who banded together to facilitate the creation of the AAHFN organization in December 2003. In 2010, the certification examination was developed by the AAHFN-CB (American Association Heart Failure Nurses- Certification Board) under the auspices of Applied Measurement Professionals, Inc. (AMP was acquired by PSI Services in 2015.). The first CHFN examination was administered in June 2011. The purpose of Heart Failure Nursing Certification is to promote the highest standards of practice within the specialty, to validate attainment of a common knowledge base required for clinical heart failure practice, and to encourage and promote continued educational growth. The CHFN-K certification was created in April, 2015 to encompass the knowledge based non-clinical nurse that impacts the heart failure community through administration, education, research, quality, industries, organizations and other quality roles. The examination is the same, but required criteria is different for the CHFN (clinical nurse) and the CHFN-K (non-clinical nurse).

Independent Testing Agency

AAHFN-CB has contracted with PSI Services to assist in the development, administration, scoring and analysis of the heart failure certification examination. PSI is a leader in the testing industry, offering certification, licensing, talent assessment and academic solutions worldwide.

Nondiscrimination Policy

The AAHFN-CB and PSI does not discriminate among candidates on the basis of age, gender, race, color, religion, national origin, disability, marital status or any other protected characteristic.

About the AAHFN-CB Examination

The AAHFN-CB examination consists of 100 multiple choice questions, plus 10 questions that are not scored, but are being pre-tested for future use. Candidates will have two hours to complete the exam.

**Taking the Examination**

When you are comfortable with the computer testing process, you may quit the practice session and begin the timed examination.

**Timed Examination**

Following the practice examination, you will begin the timed examination. Before beginning, instructions for taking the examination are provided on-screen.

The computer monitors the time you spend on the examination. The examination will terminate if you exceed the time allowed. You may click on the "Time" box in the lower menu bar on the screen to monitor your time. A digital clock indicates the time remaining for you to complete the examination. The Time feature may be turned off during the examination.

Only one examination question is presented at a time. The question number appears in the lower right of the screen. Choices of answers to the examination question are identified as A, B, C, or D. You must indicate your choice by either typing in the letter in the response box in the lower left portion of the computer screen or clicking on the option using the mouse. To change your answer, enter a different option by typing the A, B, C, or D or by clicking on the option using the mouse. You may change your answer as many times as you wish during the examination time limit.

To move to the next question, click on the forward arrow (>) in the lower right portion of the screen. This action will move you forward through the examination question by question. If you wish to review any question or questions, click the backward arrow (<) or use the left arrow key to move backward through the examination.

An examination question may be left unanswered for return later in the examination session. Questions may also be bookmarked for later review by clicking in the blank square to the right of the Time button. To identify all unanswered and bookmarked questions, repeatedly click on the double arrows (>>). When the examination is completed, the number of examination questions answered is reported. If not all questions have been answered and there is time remaining, return to the examination and answer those questions. Be sure to provide an answer for each examination question before ending the examination. There is no penalty for guessing.

**Candidate Comments**

During the examination, comments may be provided for any question by clicking on the Comment button to the left of the Time button. This opens a dialogue box where comments may be entered. Comments will be reviewed, but individual responses will not be provided.

**Following the Examination**

After completing the examination, you are asked to answer a short evaluation of your examination experience. Then, you are instructed to report to the examination proctor to receive an examination completion report.
