

Head of In-Life & Research Vet

- Two positions
- Located in Rutherford, Hunter Valley, NSW

The Company

Jurox is a 100% Australian owned Animal Health Company based at Rutherford in the Hunter Valley, NSW. We research, develop, manufacture, market and sell a wide range of veterinary medicines to the companion animal and production animal markets which are sold globally.

The Roles

We have two exciting Research Veterinarian roles within our Research and Development department located at Head Office in the Hunter Valley, NSW.

Role 1 – Head of In-Life Development

Reporting to the Head of Research and Development, this person will lead our In-Life Development team. The successful candidate will be responsible for the planning, execution and reporting of in-life development activities, as well as working with the wider Research and Development team (including Chemistry and Regulatory Affairs) to bring innovative products to market.

Role 2 - Research Vet

The Research Veterinarian provides research and technical support to the R&D Department as part of the In-Life Development team. The major responsibilities of the Research Veterinarian are to design, execute and manage in-life studies to support the evaluation of new product concepts and to generate the information required for registration dossiers and/or post-marketing purposes.

Further information can be found within the Position Descriptions for these roles here: <https://www.jurox.com/au/career/head-life-research-vet>

Criteria

We are looking for innovative team players with previous research experience within the animal health industry.

Both roles will require:

- A Doctor of Veterinary Medicine or equivalent (ideally registerable in Australia).
- Previous experience in veterinary medicine, regulatory and/or research environments.
- A good working knowledge of GLP and GCP.
- Strong experience in scientific writing and effective communication skills.
- A willingness to work hands on, conduct field studies and participate in work related travel.
- Knowledge of regulatory guidelines, experimental design and statistics, particularly related to veterinary medicines registration.
- Post graduate qualifications or experience in veterinary parasitology or reproduction would be an advantage.

Additional senior role requirements

- Demonstrated experience in managing research projects from creation to completion.
- Proven experience in managing and leading a team of scientists.

Apply
