Your Safety and Well Being is ANN's Top Priority

ANN is very much looking forward to seeing everyone in person in Chicago, but of course we realize that travel is still a concerning proposition. Please know that the health and safety of our attendees, speakers, staff, and hotel personnel are our top priority. We are monitoring the COVID-19 situation carefully and following all state, local, and hotel guidelines. We will modify the layout in the physical conference space accordingly to ensure everyone's safety.

Hotel Protocols: Click here to view the current COVID-19 protocol at the Hyatt Regency Chicago.

COVID-19 information from the city of Chicago.

COVID-19 updates from Choose Chicago, the official destination organization for Chicago.

Preconference Sessions

Wednesday, September 8

7:00 AM–6:00 PM Registration Open

8th ANNual Symposium for Nurse Leaders

8:00 AM–4:00 PM Full Day Session (6.5 contact hours)

010 8th ANNual Symposium for Nurse Leaders

Highly Reliable and Safe Care: How Leaders Drive It

Fran Griffin, RRT, MPA
Michael Pugh, MPH

Nurse leaders in today's environment need multiple skills to be effective leaders including strategies to drive improvement and support a just culture. Initiatives to move health care organizations towards high reliability require engaged nursing leadership. This interactive seminar will provide overviews of these core topics along with practical strategies and methods that nurse leaders can use immediately to enhance their efforts to lead improvement and safety efforts at their organizations.

LRN5 MNN4 OB6

Preconference Sessions

8:00 AM–11:30 AM Morning Program (3.25 contact hours)

020 Neonatal Pharmacology, Part I

Weighing Risks and Benefits when Choosing Pharmacologic Therapy for Select Neonatal Disease States

Neonatal Pain and Agitation: Should Precedex™ (Dexmedetomidine) Take Precedence?

Jennifer T. Pham, PharmD, BCPS, BCPPS
Kirsten H. Ohler, PharmD, BCPS, BCPPS

Management of Neonatal Seizures: Who's on First?

Jennifer T. Pham, PharmD, BCPS, BCPPS
Kirsten H. Ohler, PharmD, BCPS, BCPPS

Get the Skinny on Intravenous Fat Emulsion Products

Jennifer T. Pham, PharmD, BCPS, BCPPS

LRN 4 Rx 3.25

12:30 PM–4:00 PM Afternoon Program (3.25 contact hours)

030 Neonatal Pharmacology, Part II

The Delivery of Pharmacologic Therapy in Neonatal Patients: Implications of Medication Shortages, Nutrition & Vaccinations for Neonates

The Long and Short of Drug Shortages

Kristen Welsh, PharmD

ABCs of Neonatal TPN

Alexis Virlee, MS, RDN, LDN, CNSC
Hillary Zellner, MS, RDN, LDN, CNSC

Shoot Your Shot: Vaccine Timing, Dosing and Administration Concerns in Infants

Kristen Welsh, PharmD

LRN 5 Rx 3.25

Thursday September 9

6:30 AM–4:30 PM **Registration Open**

General Sessions

8:00–8:15 AM **Welcome/General Announcements**

8:15–9:15 AM

301 COVID 19 and Pregnancy: Lessons from the Frontline

Cornelia Graves, MD

Dr. Graves discusses COVID-19 and its effects in pregnancy. She addresses current management, including the management of respiratory distress in pregnancy. She also discusses the mother-baby dyad and current recommendations for vaccination in this population.

LRN1 MNN1 OB3

9:15–10:15 AM

302 Compassion Fatigue

Cassandra Kandah, MS, PhD, LCP

The act of giving is known as being more rewarding, as compared to receiving. What happens when we, who are stewards of others' emotions and care, give so much, that we are not able to give to ourselves and those who are closest to us? Methods are reviewed about how to prevent and treat compassion fatigue.

LRN5 MNN4 OB6

10:15–11:30 AM **Exhibits and Posters Open**

11:30 AM–12:30 PM

303 Safely Reducing Primary Cesarean Births: It Takes a Village

Jill E. Brown, MSN, RN

One of the largest contributors to the recent rise in cesarean rates is using this mode of delivery for low-risk, first-time mothers. The wide variation in the rates of cesarean births across hospitals suggest that some of these procedures may not be medically necessary. Compared with vaginal birth, cesarean births incur higher rates of hospital readmission and morbidity, higher costs, and often commit women to repeat cesarean delivery in future pregnancies. Cesarean birth is also associated with an increased risk of complications for the woman and infant. Ms. Brown focuses on key strategies OBI is using to reduce cesarean births and how they are harnessing the power of the Collaborative Quality Improvement (CQI) model to drive large scale change, as well as cultivate system wide support for a maternity care culture that favors vaginal birth.

OB2

12:30–1:45 PM **Lunch Break—Exhibits and Posters Open**

1:45–2:45 PM **A Workshops (Concurrent Sessions)**

311 OB Drills: Using Simulation to Improve Perinatal Care

Cornelia Graves, MD

Dr. Graves focuses on the use of simulation in the perinatal population. She introduces the concept of joint simulation protocols to involve both the neonatal and obstetrical team. During this presentation, she discusses the management of hypertension, hemorrhage, and maternal code.

LRN5 MNN4 OB6 Rx .25

312 Seen But Not Heard: Dynamics, Assessment and Interventions in Intimate Partner Violence

Patricia Klassa, MSN, RN, CNS-C, IBCLC

Intimate partner violence (IPV) is a public health problem known to have a negative impact on millions of Americans not only as a result of immediate harm but also the long-term sequelae in this vulnerable population. Many health care providers caring for survivors of IPV are not always aware of the prevalence, importance of universal screening in clinics and hospitals and best practices for caring for survivors. Ms. Klassa describes the impact women's health, and the impact that neonatal and obstetric nurses can have on these vulnerable populations.

Available On Demand

LRN2 MNN2 OB3

313 Keeping Families Close: Glucose Gel and Hypoglycemia Management in the Newborn

Taryn L. Temples, MSN, RN, RNC-NIC, CNE

Ms. Temples reviews hypoglycemia assessment and management strategies in the newborn. The use of oral glucose gel to reduce the need for NICU admission and allow uninterrupted mother-infant bonding is highlighted in this discussion.

LRN3 MNN3 OB6 Rx .25

2:45–3:45 PM **Exhibits and Posters Open**

3:45–4:45 PM **B Workshops (Concurrent Sessions)**

321 Diabetes in Pregnancy: How Can We do Better?

Melissa Zahnd, APRN, CNP, CDCES

Ms. Zahnd reviews concepts of the patient who has diabetes during pregnancy. In addition, she takes a closer look at trends relative to maternal fetal mortality and morbidity. She examines ways to improve the care of the diabetic pregnant patient.

Available On Demand

MNN2 OB3

322 What We Have Right…and Wrong… about Newborn Jaundice

Terri Russell, DNP, APRN, NNP-BC

Dr. Russell reviews developmental and pathophysiologic factors that place the newborn at risk for hyperbilirubinemia. She discusses practices that enhance the quality of care for these infants and opportunities for improvements. Case studies highlight key information.

LRN3 MNN3 OB5

323 Podium Presentations

Multiple Presenters

Peer-reviewed abstracts have been selected for podium presentations. Each session has multiple presenters. These cutting-edge presentations will bring you up-to-date on innovative research and clinical practice projects. Discover what your colleagues from across the country are doing as they share their unique experiences. A balance of clinical, research, and education-themed abstracts are presented.

LRN5 MNN4 OB6

Friday, September 10

7:00 AM–3:45 PM Registration Open

General Sessions

7:45–8:00 AM Announcements

8:00–9:00 AM

331 Innovations to Improve Maternal Outcomes

Shirley Scott, DNP, RN-BC, C-EFM, CLS, APN

Despite continued advancements in medical care, maternal mortality rates in the U.S. are far higher than those in similarly large and wealthy countries, and people of color are at increased risk for poor maternal and infant health outcomes. Dr. Scott discusses multi-faceted initiatives to improve maternal health throughout pregnancy and up to one year postpartum and ways nurses can be at the forefront of providing equitable care.

MNN4 OB6

9:00–10:00 AM

332 Maternal Sepsis: Identification and Management

Carol Burke, APRN/ CNS, RNC-OB, C-EFM

Physiological, immunologic, and mechanical changes that occur in pregnancy make pregnant women more susceptible to infections than nonpregnant women. Sepsis remains the third leading cause of maternal mortality. Discharge education and patient follow up are key as most cases of sepsis occurred in the postpartum period leading to long term sequelae for survivors. Ms. Burke discuss the definition, pathophysiology, risk factors, signs and symptoms of sepsis and evidence-based management.

MNN2 OB3

10:00–11:00 AM Exhibits and Posters Open

11:00 AM–12:00 PM

333 When Work Hurts: Workplace Violence

Daria Ruffolo, DNP, RN, ACNP-BC, CCRN

Violence against healthcare workers is at epidemic levels. Dr. Ruffolo instructs the pediatric/perinatal healthcare team about effective methods to identify patients, families, colleagues, and work environments which place the clinician at risk for violence. Included in the presentation are cues to identify when a situation is escalating and safe, effective prevention strategies.

LRN5 MNN4 OB6

12:00–1:30 PM Lunch Break

1:30–2:30 PM C Workshops (Concurrent Sessions)

341 Hypertension Disorders in Pregnancy

Carol Burke, APRN/ CNS, RNC-OB, CEFM

Hypertensive disorders of pregnancy encompass a spectrum of disorders, including gestational hypertension, preeclampsia, and chronic hypertension with superimposed preeclampsia. The incidence of preeclampsia has increased by 25% in the past 20 years and is a leading cause of perinatal morbidity. In addition, it is a known risk factor for future cardiovascular disease and metabolic disease in women. Ms. Burke discusses nursing management with pharmacological treatment with antihypertensives and magnesium sulfate.

Available On Demand

LRN1 MNN1 OB3 Rx .25

342 Newborn Assessment for New Nurses, What Do You REALLY Need to Know?

Taryn L. Temples, MSN, RN, RNC-NIC, CNE

Ms. Temples reviews the essentials of a thorough newborn assessment from head to toe and the differentiation of normal and abnormal finding. Interventions for findin that indicate a risk factor for a complication are also discussed.

LRN2 MNN3 OB5

343 Implementation of Eat, Sleep, Console for NAS in a Mother Baby Unit

Lisa Grisham, MS, NNP-BC

Eat, Sleep, Console is a relatively new assessment approach for withdrawal in infants with NAS. The literature has shown that infants rooming in with their parents has reduced the symptoms of withdrawal and significantly decreased length of stay. Ms. Grisham covers the details in how to implement of ESC in a mother baby unit. Specifically, education of staff, education for parents, how to assess using ESC, what to do when the baby cannot eat, sleep, or be consoled, staffing to support this model, and outcomes.

LRN5

2:45–3:45 PM D Workshops (Concurrent Sessions)

351 New Definitions and Guidelines to Reduce Primary Cesarean Section in Nulliparous Women

Ana Flores, RNC-OB, MSN, CLC

High rates of cesarean birth in the United States have remained a topic of principal concern among health care professionals and consumers. Updates to fetal monitoring guidelines, Re-evaluating Friedman's Curve, new definition of active labor and use of labor support to reduce the rate of primary cesareans among nulliparous women, will all be discussed in the session.

Available On Demand

OB2

352 Postpartum Psychosis: The Neonatal and Mother Baby Nurse's Role from Recognition to Referral, to Legal Advocacy

Susan Benjamin Feingold, PsyD, PMH-C

Dr. Feingold presents an overview of the most severe postpartum mood disorder. Postpartum psychosis remains the most misunderstood and stigmatized maternal mental illness. In the worst case scenario, when psychosis results in a crime such as infanticide, punishment rather than treatment is often imposed. Importantly U.S. laws need to be changed, as they are far more punitive than those of most other developed nations.

353 Newborn Transition to Extrauterine Life: Failure to Launch or Smooth Take Off

John Overby, BSN, RNC-NIC

The development of the fetus is a miraculous undertaking that culminates with a variety of physiological changes that take place as the infant is born and separated from the placenta and umbilical cord. Absence of key changes or a disruption in the process may lead to Persistent Pulmonary Hypertension–a syndrome characterized by profound hypoxemia and need for advanced support provided in the NICU. This presentation will outline the transition to extrauterine life, and the implications presented by a disruption in this process.

LRN2 MNN2 OB5

Closing Sessions

Saturday, September 11

7:00 AM–12:00 PM Registration Open

Combined Sessions with Neonatal and Advanced Practice Conferences

General Sessions

8:15–8:30 AM **Announcements & Raffle**

8:30–9:30AM

401 The Future of Nursing Practice
Bonnie Clipper, DNP, MA, MBA, RN, CENP, FACHE

LRN5 MNN4 OB6

9:30–9:45 AM **Break**

9:45–10:45 AM

402 ESCape from Neonatal Abstinence Syndrome Using Eat, Sleep, Console
Lisa Grisham, MS, NNP-BC

LRN2

10:45–11:45 AM

403 Demystifying Provider Well-Being: What Does it REALLY Mean to be Resilient?
Janice Nuuhiwa, MSN, APN/CNS, NPD-BC, CPHON

LRN5 MNN4 OB6

11:45 AM–12:00 PM **Concluding Remarks**

Topics and Speakers are Subject to Change

Call for Abstracts

We invite you to submit an abstract for a poster or podium presentation to present at this outstanding conference. Posters and podium presentations offer the perfect opportunity to network, exchange ideas, and improve the quality of nursing education for neonatal nurses. **Submission deadline is June 15, 2021.** See academyofneonatalnursing.org for guidelines and submission information.

Statement of Purpose

The purpose of this conference is to provide current and clinically applicable information for prenatal, intrapartum, and postpartum care of the mother as well as infant care, both in the hospital and through transition to home. The educational sessions provide information to nurses and other health care professionals who care for the expectant and postpartum mother and her newborn. Specific objectives for each presentation will be listed in the conference program materials.

Continuing Education

Attendees may earn up to 30 contact hours of continuing education for this conference, based on a 60-minute hour. (The main conference sessions provide 13 contact hours, preconference sessions up to 6.5, and poster sessions up to 5, and an additional "bonus" of 5 contact hours of on-demand content available in our online library.) Participants must be registered for the conference, attend at least 90% of each session, and complete evaluations to earn continuing education contact hours.

The Academy of Neonatal Nursing is accredited with distinction as a provider of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation.

The provider, the Academy of Neonatal Nursing, is approved by the California Board of Registered Nursing, Provider #CEP 6261; Florida Provider #FBN 3218, CE Broker #50-3006.

Planning Committee

Adelaide Caprio, APN, MSN, CCNS, RNC-NIC
Neonatal CNS
Rush University Medical Center
Chicago, Illinois

Christine M. Emmons, MSN, MPH, RNC-NIC, CNL
Neonatal Outreach Educator

Looking for a Virtual Option?

We have an alternative for you! ANN offers you the option of purchasing this entire conference for convenient on-demand viewing. Beginning September 30, 2021, you can listen to any recorded lecture (synched with slides) from all three conferences. That includes over 35 lectures! You will have until November 15, 2021 to evaluate and earn up to 30 CNE contact hours. It's the perfect option for you if your choice is not to travel or if you are still under travel restrictions. Please watch our website for details after the conference.

Photography

Please note that attendance at this conference constitutes an agreement by the participant to ANN's use and distribution (now and in the future) of the participant's image. These images are for ANN's use only and may appear on ANN's website, in printed brochures, or other promotional materials.

24th National Mother Baby Nurses Conference

Chicago, Illinois | September 8–11, 2021
