Death of the Skills Fair: Competency Assessment Done the Wright Way

James Edwards, MSN-ED, RN, NPD-BC, CCRN-K, CEN

Staff competency assessment and validation is an important part of any patient safety program. Skills fairs are fraught with challenges and are not proven methodologies to better patient outcomes. This intermediate-complexity workshop shares one hospital's experience on a journey to change its way of assessing and validating employee competence—and the lessons that inform its work today.

Leading From the Front: Managing Change and Competencies to Improve Care

Lakisha Flagg, DrPH, MPH, RN, CPH

Dr. Flagg's presentation includes an overview of foundational considerations for managing the 'people side of change' as well as review of use cases for skills application. Implications of and opportunities for promoting systems-level thinking will also be discussed.

Preconference Sessions

8:00 AM–11:30 AM Morning Programs (3.25 contact hours)

020 Neonatal Pharmacology, Part I: Go with the Flow: Pharmacotherapy for Hypotension and PDA

Christopher McPherson, PharmD
Amy Jnah, DNP, MSN, NNP-BC

Our speakers describe the physiology and pharmacology of neonatal cardiovascular support. The first half focuses on the physiologies of hypotension and hypoperfusion. Volume expanders, inotropes, and vasopressors utilized to support these physiologies are explored in detail. The second half focuses specifically on cardiogenic hypoperfusion caused by patent ductus arteriosus. The physiology of ductal steal is described, and the risks and benefits of available pharmacotherapies utilized to constrict the duct are explored.

040 Legal Risk and Professional Responsibility: REAL Survival Skills!

Laura Mahlmeister, RN, PhD

Heightened demands for accountability have made front-line nurses, educators, and managers increasingly vulnerable to claims of negligence. Our work environments demand competence, quality, and safety as well as compliance with healthcare law and accreditation standards. Dr. Mahlmeister focuses on skills that empower nurses, enhance work satisfaction, and improve patient outcomes.

12:30 PM–4:00 PM Afternoon Programs (3.25 contact hours)

030 Neonatal Pharmacology, Part II: Breath Easily and Go with Your Gut: Pharmacotherapy for BPD Prevention and Neonatal Gastrointestinal Challenges

Christopher McPherson, PharmD
Amy Jnah, DNP, MSN, NNP-BC

The first half of this in-depth workshop focuses on the pathophysiology of BPD and describes the risks, benefits, and optimal timing of pharmacotherapy to prevent this morbidity. The second half describes the pathophysiology of common neonatal gastrointestinal challenges. We explore in detail the mechanisms and data supporting pharmacotherapies utilized to address these challenges.

050 Improving Quality Improvement: A Hands-On Methods Workshop

Munish Gupta, MD, MMSc

Effective quality improvement (QI) interventions, using robust and rigorous methods, is a foundation of excellent newborn care. This workshop provides a hands-on approach to learning basic and not-so-basic QI methods. Participants will be asked to identify a QI target in their unit, and then will complete a series of exercises to move from an idea to a structured framework for improvement.

Doing What We Do…With a Lot Less!

Kelley Shultz, MD, FAAP

Dr. Shultz shares accounts of work being done in a developing country that has been very successful at decreasing maternal mortality and the mortality of infants less than a week old without the technology that we take for granted. She shares the successes of a train-the-trainer model and discusses the future of this mission work and what it means to the children of this region.

401 Battling Bias: Centering the Lived Experience to Advance Perinatal Care
Kimberly Seals Allers, MS

Implicit bias has been well documented as directly linked to the Black maternal mortality crises and high rates of Black infant deaths. In addition to anti-bias training and "evidence-based" maternity care, how can centering the lived experience of care of Black birthing people advance equity and improve perinatal care? Using data from Irth (as in Birth, but without the B for bias), a non-profit, doctor and hospital review and rating platform for Black and brown women and birthing people to find and leave experiences of care at OB/GYNs, birthing hospitals, and pediatricians. Ms.Allers share s findings from Irth's national database. Irth captures the intersectional experiences of birth at U.S. hospitals from Black women and birthing people, including lactation support, and analyzed the data to identify trends and patterns of bias to develop insights, and actionable strategies to improve perinatal care and support for Black and other families of color.

402 Panel Discussion: Palliative Care in the Perinatal Setting
Lori Wood, MSN, CNS, RNC-NIC, IBCLC
Tracy Gill, BSN
Timothy J. Chinnock, MD

This session includes a presentation of the evidence and science surrounding palliative care programs in the perinatal setting. Clinical presentations of infants, common diagnoses necessitating palliative care, program inclusions, and family needs and participation are included. Collaboration between providers: nursing, NICU, pediatrics, and perinatal departments is discussed. Program development and roll out are shared.

403 Nursing: The Future is Ours!
Donna Cardillo, RN, MA, CSP, FAAN

Nursing stands at the precipice of radical change. As such, a unique opportunity presents itself for us to take on a larger and more pivotal role in healthcare beyond anything that most of us could have ever imagined. As this new role takes shape, nurses will need to change their way of seeing themselves, their profession, and their capabilities. It's time to start owning our power!

Call for Abstracts

We invite you to submit an abstract for a poster or podium presentation to present at this outstanding conference. Posters and podium presentations offer the perfect opportunity to network, exchange ideas, and improve the quality of nursing care. See academyofneonatalnursing.org for guidelines and submission information. Submission deadline is June 30, 2022.

Statement of Purpose

The purpose of this conference is to provide clinically current information on the technical, medical, and nursing aspects of neonatal care. The educational sessions provide information to nurses and other health care professionals who care for newborn, premature, and ill infants and their families. Specific objectives for each presentation will be listed in the conference program materials.

Continuing Education

Attendees may earn up to 35 contact hours of continuing nursing education for this conference, based on a 60-minute hour. Main conference sessions 14 contact hours, preconference sessions up to 6.5, and poster sessions up to 8. An additional 6 bonus credits will be added for full conference attendees when the conference concludes. Participants must be registered for the conference, attend at least 90% of each session, and complete evaluations to earn continuing education contact hours.

The Academy of Neonatal Nursing is accredited with distinction as a provider of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation.

The provider, the Academy of Neonatal Nursing, is approved by the California Board of Registered Nursing, Provider #CEP 6261; Florida Provider #FBN 3218, CE Broker #50-3006.
