IntMedCoLLC@gmail.com

Dear Colleague,

For the first time in these United States an insurance healthcare plan will pay for integrative medical services using a standardized HCFA 1500 form. This is truly a historic moment in medicine, and the sprouting of actual, comprehensive healthcare in America. However in order to implement this reality, Utopia Wellness, on behalf of INTEGRATIVE MEDICAL CO-OP, LLC, has been tasked with reaching out to like-minded practitioners to form a practitioner co-operative, named INTEGRATIVE MEDICAL CO-OP, LLC,.

For decades, physicians and other experienced health professionals admitted that the American healthcare system needs an overhaul. Recognizing that “the system is broken”, without prioritizing the steps to repair it, is an all too familiar refrain. However, no one has ever conceived, formulated and delivered an achievable, viable, and strong integrated product. This Co-op is the first of its kind, composed of medical practitioners who practice intelligent medicine using a systems biology and a patient-centered approach to safely and effectively treat their patients. We all realize that there is an onslaught of non-communicable, chronic, degenerative diseases currently facing us as healthcare practitioners. Traditional medicine’s efforts to be more effective are stymied in too many ways. This Co-op, with its integrative practitioners, offers and provides effective complementary alternatives to our current mid-21<sup>st</sup> century, conventional, symptomatic oriented treatments. This Co-op proposes to coalesce all available medical modalities to address and remedy the challenges imminently ahead. I understand this proposal is perhaps too controversial for some; however, our current medical treatment comfort zone is no longer tenable. We must evolve and no other group of people are better qualified to initiate and guide these needed changes than we, the practitioners of our integrative medical art.

This approved healthcare plan is the first of its kind in America and perhaps the world, and as such this is a work in progress. No one has ever accomplished what is being presented here! The attachments delineate the list of approved modalities *so far*. This list will evolve as the year progresses. Input to this list is welcome and encouraged from all participants. A panel of likeminded practitioners will participate in a round table forum to add modalities and share ideas for this groundbreaking venture.

If you are interested in joining this Co-op, please complete and return the attached application.

I hope you are as excited as I am in forging real, quality, practitioner-generated healthcare for America.

Sincerely,

Carlos M. García, M.D.
