

# Victor Gallo

Please join us in welcoming Victor to our Board of Directors. Victor joins us from Adventure Playground in Costa Rica.

Victor has been a rope rigger since 1989, an Aerial Adventure park builder since 2003, and a Certified inspector since 2010. He has been Designing, Building and training for courses in Latin America and the Caribbean

"Having been part of the initial task force that brought the Canopy and Zip line Tour industry into ACCT and seeing the Association's growth since then, I believed that there were still more doors to open.

One of them was the push to have the ACCT standards translated into Spanish which happened in record time after lobbying and jumping hurdles for many years. I am all for the interests of the Latin American and the Caribbean industry which needs better use of standards and safety measures considering it is one of the largest markets in the world."

# Rohan Shahani

We also would like to welcome Rohan Shahani from Challenge Works, Inc.

He has been fortunate to spend at least 100+ days a year on challenge courses, zip lines, or aerial adventure parks since 2010. He has experience as a facilitator and trainer, and has worked extensively in educational and corporate settings. Most recently, he has served as Director of Training for Challenge Works, a full service Professional Vendor Member of ACCT.

"It's an exciting time to be a part of the Challenge Course and Aerial Adventure industry! Whether you are facilitating an educational program, operating an aerial park, or guiding guests through the canopy, you are a part of a rapidly changing industry that needs you more than ever.

As an ACCT board member I will aim to help drive reconciliation of the various sectors with the goal of increasing membership engagement. I will work to support the continued development of member resources, and work to help every member feel like the valued part of our community they are."
