As an owner, you understand your community is unique. And each of its projects are likewise unique. Therefore, when choosing a design professional to partner with on a project, you must take into consideration qualifications, experience and scope of work.

To apply the most creative, efficient, cost-effective solutions to a project, the design professionals should be selected based on credentials and qualifications, not by the lowest fee. Projects are not "one size fits all" so you should consider your engineer through a process of qualifications for each unique project in your community.

What is QBS?

QBS is a proven step-by-step process that facilitates selecting the right professional design firm based on overall merit of their qualifications and design approaches. This creates a fair competition, and encourages creativity, innovation, and deeper thinking about the entire life-cycle of the project.
