Congratulations to the Town of Plainfield, for winning the Annual Qualification Based Selection Award at this year’s Engineering Excellence Awards. The Town utilized QBS for the design and construction of the Plainfield Fire Department Headquarters Building, Fire Station 122, and the Moon Road Improvements.

Timothy Belcher, the Executive Director of Development Services for the Town has noted that this procurement method allowed the owner to deliver projects faster than the typical design-bid-build method they normally use. In addition, it also allowed for avoidance of claims and change order problems, according to Belcher.

When beginning your selection process for your next big project, use the method utilized and trusted by many Indiana communities. Use QBS!
What is QBS?

QBS is a proven step-by-step process that facilitates selecting the right professional design firm based on overall merit of their qualifications and design approaches. This creates a fair competition, and encourages creativity, innovation, and deeper thinking about the entire life-cycle of the project.
