ACI Alliance needs your involvement to help policymakers understand what matters to children and adults living with significant hearing loss.

CI CAN
COCHLEAR IMPLANT CONSUMER ADVOCACY NETWORK

American Cochlear Implant Alliance is a not-for-profit membership organization created with the purpose of eliminating barriers to cochlear implantation by sponsoring research, driving heightened awareness and advocating for improved access to cochlear implants for patients of all ages across the US. ACI Alliance members are clinicians, scientists, educators, and others on cochlear implant teams as well as parent and consumer advocates.

The Cochlear Implant Consumer Advocacy Network (CI CAN) is our new initiative to help CI patients and families work with us to expand ACI Alliance grassroots advocacy efforts. CI CAN members participate as much they desire. Your contributions will include everything from social media, write-in and call-in campaigns to meetings with state or federal officials.

By helping policymakers understand what matters to people and to the process of providing quality CI clinical care, your personal stories of living with significant hearing loss yourself or with a family member or friend are critical to our success. ACI Alliance has a history of successful advocacy at the state and federal level, and our current legislative priorities are highlighted at www.acialliance.org/page/AdvocacyInitiatives.

Anyone who has or needs a cochlear implant or supports others may join the network. ACI Alliance staff and volunteers will provide training and guidance, and there is no cost to join or participate. Training will be conducted via email or live virtual/visual events with captioning.

Join our network and help us make a difference!
