## High throughput, multi-residue screening

Waters  
THE SCIENCE OF  
WHAT'S POSSIBLE.™

Ideally suited for analytical challenges in food safety and water quality testing, Waters' Pesticide Screening Application Solution with UNIFI™ gives scientists the ability to test more food products and environmental samples for increasing numbers of residues and contaminants below regulatory limits.

## Product Showcase

## SPEX CertiPrep is pleased to announce the addition of two new Certified Reference Materials

SPEX CertiPrep is pleased to announce the addition of two new additions to our growing line of consumer safety Certified Reference Materials. We now proudly offer a phthalates in polyvinyl (PVC) standard, as well as a matrix blank. The regulations for phthalates in children's toys have forced the testing of thousands of children's products for these restricted phthalates creating an increased need for these certified reference materials.

SPEX CertiPrep  
Your Science is Our Passion.®

SPEX CertiPrep is accredited by A2LA to ISO Guide 34:2009 and ISO 17025:2005 and certified by UL-DQS to ISO 9001:2008. Additional consumer safety standards include BPA and phthalates in polyethylene, heavy metals in polyethylene for RoHS/WEEE analysis, and aqueous standards for determining trace metals in plastic toys. SPEX CertiPrep provides the quality Standards needed to calibrate and verify systems to ensure accurate analytical results.

## Introducing Freestyle™ Sample Clean-up workstation

Pickering Laboratories introduced the Freestyle™ Sample Clean-up workstation from LCTech at the AOAC international meeting. Building on the success of the GPC Ultra product line of Gel Permeation Chromatography the Freestyle™ is an innovative design adding new time saving features to the automated sample clean-up work flow.

PICKERING  
LABORATORIES  
CATALYST FOR SUCCESS

The Freestyle™ starts with a XY robot arm for automated platform for liquid handling ; dilutions, additions, mixing, extraction, dispensing, and other operations. Add the SPE module to enable SPE processing which includes the ability to hold and inject simultaneously. Add the GPC module for GPC processing for up to 5 GPC switching columns. Add the EVA module for programmable evaporation and solvent exchange for a completely automated GPC in-line evaporation instrument.

Flexibility of the system starts with the suspended rack design. Able to handle multiple flask shapes from 1 mL to 1 Liter. The Freestyle™ software is drag and drop to program multiple sample parameters and able to handle exceptions to insert into the workflow. Graphical reporting and full audit logs round out the robust software.

The Freestyle automation of sample clean-up saves time, improves consistency and protects your staff from potentially harmful chemical exposure. Find out how Freestyle™ can solve your sample clean-up challenges.

Freestyle™ is an innovative design adding time saving features to the automated sample clean-up work flow. For GPC, SPE, evaporation and liquid handling; dilutions, additions, mixing, extraction, dispensing, and other operations. Handles glass sizes from 1 mL to 1 Liter. Freestyle™ can solve your sample clean-up challenges

## Horizon Technology, Inc. Announces the XcelVap™ Evaporation/Concentration System

The XcelVap automated benchtop Evaporation/Concentration System is a modern compact benchtop laboratory product that provides rapid, gentle evaporation of up to 54 sample extracts, ranging in size from less than 1 mL up to 200 mL.

technology  
PREPARE FOR BETTER RESULTS[Read More](#)Centurion Series  
Water/Soil Auto-Sampler

The only auto-sampler to provide a 400:1 dilution allowing analysts to automate calibration. This eliminates human error and saves a tremendous amount of time. Both of which ensuring data of the highest quality and optimizing sample throughput.

## ESS Offers a Full Line of Tedlar Bags

After a period of suspended sales of Tedlar film by DuPont Inc., ESS now has a full line of Tedlar Air Sampling Bags including ½, 1, 3, 5 and 10 liter sizes.

ESS  
ENVIRONMENTAL SAMPLING SUPPLY

Along with our 2-N'-1 valve, ESS is the only supplier to offer "lot certified" bags for volatile compounds (TO 14) and sulfur. ESS bags incorporate a single grommet and an attached label. Bags come 10 per case and also include a "low bleed" septa for syringe extraction.

For more information, contact ESS at 800 233-8425
