RESEARCH INTERESTS

My research agenda is to produce scholarship in service to society. I expose barriers to building
beloved communities supportive of Black racial uplift and self-determination. Striving towards a
radical, Afrocentric-feminist planning agenda, I use ethnography, historical research and
quantitative data analysis to tell planning stories from marginalized groups’ perspectives. The
geographic focus is the Caribbean region, particularly Haiti; Caribbean ethnic enclaves in the
U.S.; and the transnational networks which connect the Caribbean diaspora across space and
time.
