

AMERICAN COLLEGIATE SCHOOLS OF PLANNING
PLANNERS OF COLOR INTEREST GROUP

2021-2022 CURRICULUM VITAE BOOK

POCIG'S VISION

The vision of The Association of Collegiate Schools of Planning Planners of Color Interest Group (ACSP-POCIG) as outlined in its 2011 strategic plan is as follows:

We envision a planning academy and profession that advances social and racial justice. We envision the evolution of this academy so that its faculty and students reflect the nation's diverse people. We envision that the mission of POCIG is viewed by all as critical to the health and future of the institution of ACSP.

We embrace three fundamental premises: first, that planning as a field recognizes social and racial justice as central to the vitality of places, and it recognizes disparity and injustice as barriers to thriving, sustainable, resilient communities. Second, planning scholarship recognizes and illuminates institutionalized inequality, structures that perpetuate inequality, and the fact that all planning issues are inextricably linked with race and class issues. Third, planning education prepares professionals to work with communities of color and seek social justice through expansion of choice and opportunity for all persons.

The planning academy—its faculty and students—represents the full diversity of our people in our society. Many of our planning schools are inclusive, with robust engagement with communities of color. POCIG is a locus of connection, networking, and support for planning academics of color in ACSP and in ACSP member schools and other institutions of higher education. The research, knowledge, and participation of POCIG guide the programmatic aims of ACSP in addressing diversity in the planning academy.

Projects (selected)

Planning car-lite neighborhoods: Won't you be my auto-independent neighbor?

Jan 2019 - PRESENT

COLLABORATORS: JOSEPH FERREIRA (MIT)

Cambridge, MA

- Investigating the potential of transit-oriented MaaS in improving post-pandemic regional sustainability (NSF Award #2043385)
- Examining how substantial accessibility improvements by new mobilities (e.g. bikesharing, ridehailing) can change neighborhoods
- Exploring integrated housing-mobility policy programs that can enable neighborhoods to become less auto-dependent

New legs for walking: Big data approaches for pedestrian behavior analysis

Jan 2020 - PRESENT

COLLABORATORS: ANDRES SEVTSUK (MIT)

Cambridge, MA

- Creating a pedestrian impact assessment framework to quantify the impact of new developments on pedestrian activity
- Analysing how anonymized big data can be used to compare built environment effects on pedestrian route choice across cities

Car today, gone tomorrow: Experiencing carlessness in auto-dependent societies

Jun 2019 - PRESENT

COLLABORATORS: NICHOLAS KLEIN (CORNELL), MICHAEL SMART (RUTGERS)

Cambridge, MA

- Examining the frequency and length of episodes of carlessness, and their effects on low-income households in the US
- Comparing the effects of losing a car on quality of life and economic outcomes between households in the US and UK

Experience

Future Urban Mobility Interdisciplinary Research Group (FM-IRG), SMART, MIT

Jan 2018 - Jun 2021

GRADUATE RESEARCH ASSISTANT

Cambridge, MA

The World Bank

May - Jul 2018

CONSULTANT ON ICTS AND SUSTAINABLE MOBILITY

Washington, DC

Intelligent Transportation Systems (ITS) Lab, MIT

Sep 2016 - Jan 2018

GRADUATE RESEARCH ASSISTANT

Cambridge, MA

City of Guadalajara

Sep - Dec 2017

CONSULTANT ON TOD (PRACTICUM)

Guadalajara, MX
