Global Time Differences
Chart created by the ACSP

This is the chart we created and used to determine how to schedule presentations for presenters with a home institution based outside of the United States, or based in time zones that would make participation a bit more challenging using Los Angeles, CA and New York, NY as our parameters.

The effort was made to schedule paper presentations within the hours of 7:00am and 9:00pm in your part of the world on November 5-8, 2020 (U.S. dates).

We used a web site called The World Clock Meeting Planner. It provides the option of entering a specific date and two locations in the world to determine how to schedule something. This is the link to the tool.

We admit to finding all of this a sizeable challenge and to likely missing nuances here and there in the global scheme of time:

• *Some countries span more than one time zone. If this is the case, a large city was decided to be the determining factor, and we ask that you adjust your personal schedule accordingly.
• Countries on the opposite side of the world from the United States may require a date adjustment as well, but we’ll have to count on you to know how to manage your schedule in this regard. Our primary concern was the timing of your presentation, not the calendar date.
• Countries and multiple parts of countries use Daylight Savings Time in different ways, and changing on different dates. We’ll also have to count on you to manage these adjustments.
• If the schedule causes undue hardship for a live presentation, please contact us about pre-recording your paper presentation. We will not be able to accommodate roundtable participation.
• If a country is on this list, we had an accepted paper from an author in this country.

Scroll for the chart. Thank you!
