

PLANNING: practice, pedagogy, and place

56TH ANNUAL CONFERENCE
THE ASSOCIATION OF COLLEGIATE
SCHOOLS OF PLANNING

November 3-6, 2016 ~ Portland, Oregon

Hosted by Portland State University and the University of Oregon

This conference theme considers the role played by academic urban planning programs in practice and in place. Urban planning is unique and important because as a field it grapples with the study of real problems in real places; professional degree programs train those who will not only study but act. At the 2016 conference, participants will be especially encouraged to reflect on the relationships of planning programs with practice and/or place and how our pedagogy engages these relationships. We encourage participants to engage with challenging questions for our field and our departments, to dialogue with one another and to bring additional voices into the room—practitioners, community members, and students. We see the conference—the key gathering of planning academics in conversation—as an opportunity to build the conversations about what urban planning in the academy is and means, how it is important to universities, and what it means to the places we inhabit and serve. Some areas to explore include:

- **SCHOLARSHIP** - Planning research is often applied, place-based, and 'just-in-time' based on unfolding events. Is this kind of research a competitive advantage for planning as compared to the traditional social science disciplines? How are planning scholars making the knowledge from this kind of research useful for practitioners as well as introducing it into the scholarly literature on relevant issues?
- **PEDAGOGY** - While some disciplines are just now exploring the concept, community-engaged teaching and learning have been a long tradition in planning departments using studio and project courses to educate professionals. What pedagogies are planning programs articulating for community-engaged teaching? How are planning programs working effectively with communities in authentic, non-exploitive ways that produce real benefit? What can planning programs do to model this for our universities?
- **PLANNERS, PRACTITIONERS** - Being engaged scholars, working with practitioners and studying practice are critical to teaching future professional planners. How do planning programs reflect practice in our pedagogy? How do we adapt the teaching of planning to reflect current and anticipated needs for new skills and knowledge? What mechanisms do we use to respond to practitioner needs and address perceived rifts between academic and practicing planners?
- **IMPACT** - Measuring the impact of our programs is becoming increasingly important in our own universities and in (re)accreditation. How can we gauge the extent to which university planning programs affect practice? How can we assess planning schools' contributions beyond our scholarship, through engagement and the activities of our alumni?

NOTES ABOUT THIS SCHEDULE

This document includes pre-organized sessions, roundtables, posters and sessions of individual paper presentations formed by the track chairs.

- **This schedule is current as of October 14, 2016**
- The schedule of meetings, special interest group events, and special sessions will be added here before September 9.
- The Book of Accepted Abstracts and a Schedule at a Glance can be found at www.acsp.org in the Events & Activities/Annual Conference pages.

Proposal # and Abstract ID

When submitted to the abstract management system, each abstract is assigned an abstract submission ID number for administrative search/find purposes. This is the number that authors should reference to staff with any questions regarding their abstract, their presentation, or their final paper submission.

Organizers of pre-organized sessions used the abstract submission system to provide an overview or intent of the session, the name of a suggested discussant, and the authors and paper titles of those confirmed to be part of the session. The system assigned a proposal number to the grouping of these abstracts. This number is for administrative purposes of this book. The sessions will be renumbered for the schedule of presentations (although the abstracts will retain their abstract ID number).

Order of Authors

The abstract management system used by ACSP allows for author role declaration.

- **For paper and poster abstracts** - Authors of abstracts are indicated as presenting, primary, or co-authors. The presenting author is always listed first, typically followed by the primary author. No more than eight authors for one paper are included.
- **Roundtables** will have an organizer and a moderator. The remaining names listed are confirmed participants of the discussion while anyone in the audience can participate in the discussion. There can be a total of eight names listed for each roundtable.
- **Pre-organized sessions** will also have an organizer and some at this point will have a suggested discussant. This suggested discussant has yet to be confirmed and their participation will be verified prior to the schedule of presentations being created.

Multiple Program Placement Policy:

Multiple abstract submissions on behalf of one author will be reviewed and may possibly be accepted and included in this publication. However, more than one presentation of a formal paper and more than one appearance as a roundtable participant during the conference will not be allowed. It is, however, possible to present both a poster and a paper, if both proposals are accepted. Participants on the final program will be limited to: one presentation of an individual paper whether in a formal paper session or involved in a pre-organized paper session; one placement on a roundtable; one placement as a discussant of a paper session; and one placement in the poster session. These roles are not interchangeable. If you have more than one submitted paper abstract accepted and are invited to participate on more than one accepted roundtable, in fairness to everyone, we will ask you to limit your participation.

Requests for Edits

If information is missing about an author, it was not provided by the individual submitting the abstract. In some cases, the translation of text using copy/paste into the abstract system may not have been completely successful. We do understand the importance of names, paper titles, and authors who are added or dropped. In these instances, any necessary changes for the final program should be sent to ddodd@acsp.org.

This document will be updated on a weekly basis and as we get closer to the conference almost daily.

- **Items in red text** – not yet confirmed, and in some cases, require reconfirmation.

- **Room assignments** will not be made until the app becomes available for the conference. Watch your email for an invitation to enter the app.
- **Pre-organized sessions** may have title variations from the original submission, and papers added to them that were not in the original proposal.

Requests for Rescheduling

The conference committee and association staff will schedule an anticipated 200-215 sessions for approximately 850 faculty and student presenters in 12-14 time slots over four days with only 15-16 meeting rooms to work with. ACSP Committee Meetings, journal meetings, and other special sessions must also be included in the schedule. We appreciate your understanding of just how difficult it is to make any changes to the schedule once all participants have been notified and the schedule is posted to the web. Presenters unable to present at the scheduled time must notify the conference management office in writing and withdraw from the program. Your presentation schedule cannot be rearranged.

Policy for Presenter's Registration for the Conference

A historical policy is enforced - if you hope to see your name in print in the final program for the conference, *you must register by the early presenter's deadline*. If you don't make this deadline, we will remove your name from the program.

Audio Visual Equipment Available for On-Site Presenters

Pre-Set Equipment

The conference supplies data projectors, screens and podium (no microphone). Slide projectors are available only by request and reservation. Any other audio visual equipment requirements will be at the presenter's expense. Contact the Conference staff before arriving at the conference hotel.

Data projectors will be set in every presentation room. Presentation rooms are staffed by student volunteers, but these volunteers are not trained on the use of the equipment. The audio visual company providing the projectors will have limited staff on site to assist with technical difficulty and will be working in more than a dozen different presentation rooms. In other words, we strongly recommend making yourself comfortable with these types of projectors before your arrival. Most of them are standard and simple in operating procedures

Laptop Protocol

Laptops are NOT provided, nor does the staff have any available to "borrow just for an hour." If you don't have one, be prepared to borrow one from a friend. If you don't have any friends, we will be glad to introduce to people

- Mac Users - bring the Dongle adapter to plug into a PC port on the data projector.
- Please remember to bring your power cord.

Speaker Ready Room

The Speaker Ready-Room will have the same exact equipment available as in the presentation rooms. The room is available on a first-come, first-serve basis so please be patient with your fellow presenters, but we also ask that in fairness to everyone, please limit your time when using the equipment.

- Computer station set with PowerPoint and Microsoft Word software, a CD R/W drive and flash drive for memory sticks. This computer will not have internet access. It is strictly for double checking your presentation. The ACSP does not provide data storage materials.
- An LCD projector to preview your presentation. Bring your own laptop to practice plugging in before your presentation.

Internet Access

Internet access is not provided by the ACSP in the Speaker Ready Room or in any of the session rooms. Please see the information section of the final conference printed program to know where the hotel may provide free or fee-for-service internet access.

Presentation Tips

- Arrive at the session room five minutes prior to the scheduled starting time.
- Introduce yourself to the other presenters and to the moderator and discussant. If no moderator is present for whatever reason, please nominate someone among the presenters to act as the time manager for the session.
- You will be instructed by the moderator before the session on the length of your presentation. This will inevitably vary between sessions depending on the number of papers to be presented and whether there is a discussant. You therefore need to structure your presentation around key points and arguments. You will not be permitted to speak longer than the allocated time, as this would be unfair to other presenters. The moderator is instructed to intervene by means of a system of colored cards.
- In a formal paper session, you will have only 10-15 minutes to present your work. Sessions with five papers may only have 10-12 minutes for each presentation.
- Do not attempt to read your paper. Don't turn your back to the audience to read a projected text and don't read out loud what your audience can read for itself. Use PowerPoint wisely.
- Indicate at the beginning of your talk if you are willing to send electronic versions of your paper when you return to your office.

- Concentrate on what is new, interesting and different rather than providing full theory and methodology.
- If you have any concerns about setting up your presentation, please take advantage of the Speaker Ready Room and conference/audio visual staff to assist you *before your scheduled* presentation. A.V. technicians will be available for projector equipment failures in session rooms if they occur, but absolutely should not be tied down to assisting you with your laptop the minute before your presentation. That being said, if you do experience trouble at the very minute you're to present (it happens!), please step aside immediately and offer the time to another presenter while you work out your trouble - AND don't hesitate to ask us for help. We will always do what it takes to get you up and going.
- Within each session some time will be devoted to questions and discussion. There will be informal opportunities to discuss your ideas with participants at the various social events. Please do not feel that you must cram everything into 15 minutes.

Submit Your Paper to your Discussant and other Presenters

Your final paper must be sent to the discussant of your session, other presenters in your session, AND conference organizers by separate deadlines (see below). If you do not send your final paper by the deadline, the discussant has the option of making no comments about your work.

The name and the email address of your discussant can be found by reviewing this session schedule. This document will be continually updated throughout the next couple of months. If your discussant is not yet confirmed at the time of the final paper deadline, the conference management office will advise you as soon as the discussant is confirmed and we will ask that you email your paper immediately to the discussant.

We also encourage you to send your final paper to the other presenters in your session. Presenter email addresses can be found in this document. This will enhance and hopefully stimulate discussion after all presentations are made.

Submission of Final Paper to Conference Organizers

Please submit your final conference paper to MaryBeth@acsp.org **NO LATER THAN 5 P.M. EST ON OCTOBER 5**. Doing this will ensure that the 2016 Conference Program indicates that your paper is available to conference attendees upon request.

Email subject line: Abstract Submission ID _ _ _ /Presenting Author's Last Name

- We do not publish the final papers. We distribute them to other attendees wishing to read them.
- The Abstract Submission ID number for every abstract can be found just below each paper title.
- **DO NOT** send PowerPoint presentation files.
- **DO NOT send your final paper if it isn't really, really final.** We can't promise the wrong version won't be shared.
- Requests to read a paper should also be sent to MaryBeth@acsp.org. Remember the ACSP office is closed the entire week after the annual conference.

Please send your paper to MaryBeth@acsp.org IN ADDITION to sending it to your discussant. Some paper sessions are planned to be without a discussant. For a session such as this, authors need only send the paper to ACSP, but may wish to send it to your fellow session participants as well. Participant email address can be found in the conference program.

If you are unable to make the October 5 deadline, please do finish your paper in advance of the conference. You can of course still present that paper if a final edited version isn't finished. It just won't be noted in the conference program as having been finished prior to October 5. We suggest letting the audience in your session know the paper is available and they can use the conference app messaging system (or a direct email message to you) to ask for the paper.

This new element of the annual conference is in response to considerable concern expressed in recent years about papers being submitted extremely late or not at all. I think we'd all agree that paper sessions are much stronger when they are supported by full papers, even when those papers are perhaps still works in progress. October 5 is the last date by which changes can be made to the program, which then goes out for printing.

Final Paper Format

Although there are no official guidelines on the format of your full paper, please submit your paper as an attachment to an email. Microsoft Word is probably the most widely used and readily accessible software format - we suggest you use this software and a very common font, or save your file as a PDF. We do recommend a 20-page limit as discussants only have as much time in their day as you do, and we ask them to pre-read 3-5 papers prior to the conference. Do not submit PowerPoint presentations. PowerPoint is only to be used for the actual presentation.

Many in the planning community utilize the American Psychological Association (APA) style for writing in the social and behavioral sciences. For more information or to obtain the APA Manual visit <http://www.apastyle.org/>.

ACSP does not publish a conference proceeding book and, therefore, ACSP does not publish style, spelling and usage guidelines. The ACSP *Journal of Planning Education and Research* (JPER) states in its "Guide for Authors" (on the inside of back cover) that it uses the Chicago Manual of Style. Please also refer to the JPER Guide for any citation questions.
