Anatomic Pathology Reading List (Phase II, Tampa)

The Phase II examination in Anatomic Pathology tests knowledge of animal disease, and descriptive and interpretative skill in veterinary pathology. Test items pertain to specific species, systems or diseases, laboratory management and entities commonly observed in the practice of veterinary pathology.

This reading list is provided as guidance for candidates. The sources are common journals and textbooks that represent the appropriate level of pathology knowledge. Candidates should feel free to utilize other equivalent sources and they should seek mentor guidance if they are unclear about source equivalency. For journals, candidates should focus on articles published within the last five years, but note that only articles in print or electronically released by January 1st of the examination year are considered for that year's examination. For textbooks, candidates should utilize a recent version that is representative of current pathology knowledge.

Principal sources

- Maxie MG. Jubb, Kennedy and Palmer's Pathology of Domestic Animals
- Zachary JF. Pathologic Basis of Veterinary Disease
- Latimer KS. Duncan and Prasse's Veterinary Laboratory Medicine
- Veterinary Pathology
- Journal of Comparative Pathology
- Journal of Veterinary Diagnostic Investigation
- Clinical pathology atlas (examples include Raskin RE, Meyer DJ. Canine and Feline Cytology or Valenciano AC, Cowell RL. Diagnostic Cytology and Hematology of the Dog and Cat)
