

PARTICIPANT SYLLABUS

Abstract

The First 90 Days program helps new fraternity/sorority professionals acclimate to one of the most unique roles in higher education. Through a series of interactive web conference sessions, small group discussion, and special projects, participants build their networks, understand their positions, and learn how to put their expertise into practice.

The program was completely redesigned in 2015 based on a needs assessment of fraternity/sorority professionals and stakeholders at every level of expertise. The result is a developmental experience that provides clear expectations about what it means to be a campus-based professional and helps participants transition into the role more effectively.

During the program, participants interact with a variety of colleagues to build a network of expertise that they can draw upon throughout their career. They integrate professional philosophy into daily practice and work with their supervisor to clarify what is expected of a fraternity/sorority professional. The experience also helps participants identify their continued professional development needs and aspirations beyond the program.

Learning Outcomes

The program is built to help participants achieve the following broad learning outcomes:

- List, describe, support, apply, and internalize guiding ideas for professional practice
 - Integrate existing knowledge and skills into practice
 - Establish a network of expertise through relationships with multiple individuals in a variety of knowledge and skill areas
 - Understand, appreciate, and implement strategies for navigating interpersonal influence
 - Report a stronger sense of direction, confidence, responsibility, and ownership over the work
-
