

Norovirus Outbreak Made Easy?

Utilizing incident command tactics for infectious disease outbreak responses

PRESENTER:

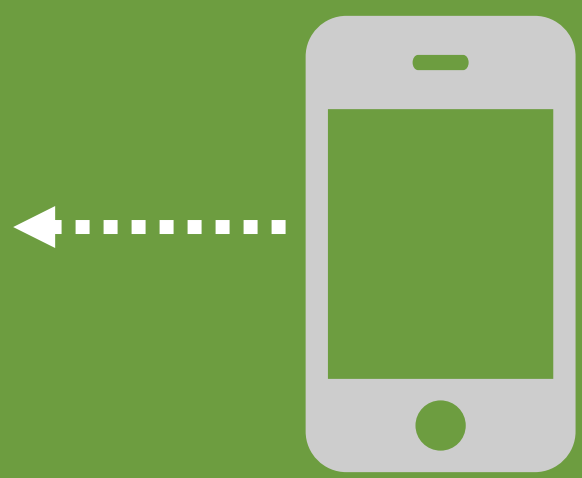

Kristine Sanger, BS, MT (ASCP)

- INTRO:
- Norovirus outbreaks have the ability to result in a surge of communicable patients in healthcare settings.
 - Just-In-Time (JIT) training materials help prepare responders for various aspects and tasks involved during an infectious disease outbreak response.

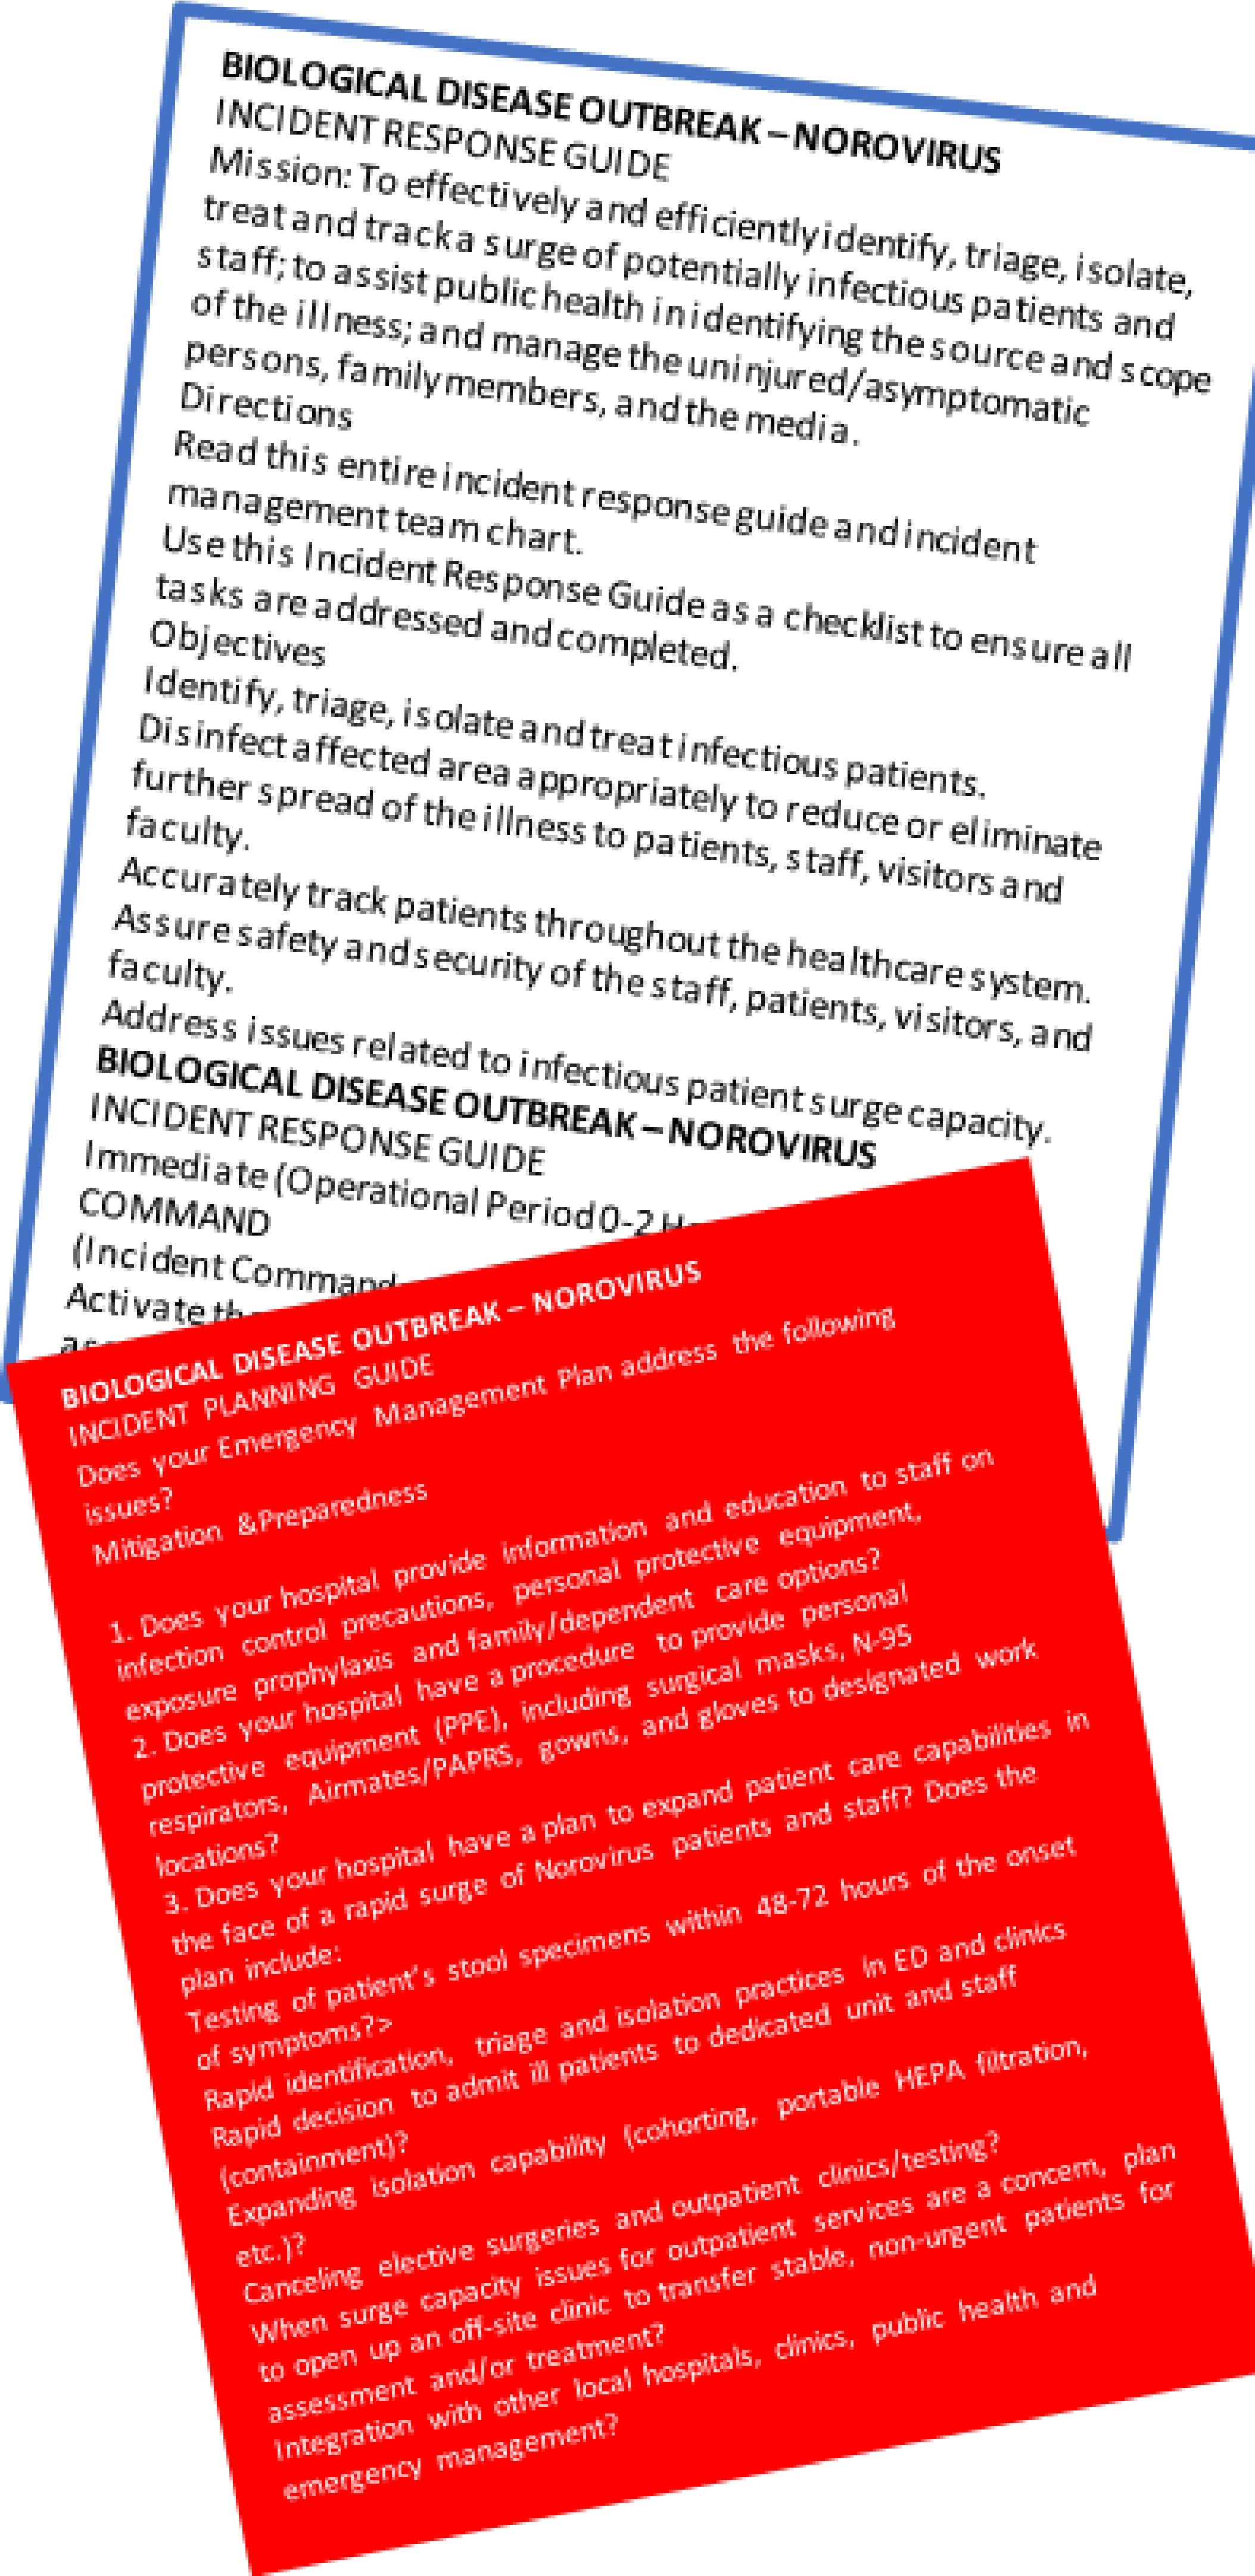

- METHODS:
- Published Hospital Incident Command System (HICS) guides were used to develop just-in-time training materials tailored for norovirus.

- RESULTS
- A just-in-time training tool tailored for norovirus was developed, including:
 - A scenario,
 - An incident planning guide, and
 - An incident response guide.

NOROVIRUS Just-in-Time training tool developed to improve response time and efficiency.
