A Retrospective on the Master Builder

Please join us for Architektōn: a retrospective on the master builder. The role of the Architect has changed throughout history. Architects had early acknowledgement through the Greek term, “architektōn” which is derived from two parts, archi meaning ‘chief’ and tektōn meaning ‘builder’, defining the profession as chief or master builders. As construction techniques and building complexity have expanded, separation of the role of the architect and builder has occurred. Although Architect’s are now known as individuals who design buildings and often supervise construction, Architects still have the opportunity to be recognized as the leading professional in the design and construction industries.

Working in the collaborative realm of today’s construction industry Architects work to create elegant design solutions that address a range of functional, structural, and environmental needs. Architektōn hopes to acknowledge the areas where architects have the opportunity to demonstrate expertise and help re-establish our profession as an expert in a broad industry. Please join us in celebrating the importance of highlighting the skillsets Architects provide or could provide for the design and construction profession and the impact we have on the community.
