CONTROL INTERFACE ADDRESSES BARRIERS THAT IMPEDE INDUSTRIAL LAUNDRY PRODUCTIVITY AND OVERALL PROFITABILITY

SCADASL™ Control Interface by Ellis

ITASCA, IL, April 11, 2018 – ELLIS Corporation, an industry leader in laundry products and water systems, has launched the companies' latest, groundbreaking innovation, the SCADA control platform. The first of its kind HMI/SCADA Control Interface platform available to the industrial laundry industry. Now available on the Ellis Side Loading washer extractors, the SCADA control reaches a new level of sophistication in machine controls and user interface.

SCADA's break-through engineering and design technology, provides a modern-day, simple to navigate touchscreen interface. With a quick screen glance or simple finger touch/scroll, operators and plant management can precisely monitor, control, and visualize every aspect of the machine's function. The control offers schematics, visual self-diagnostics, 1-2-3 and 4 level troubleshooting, preventative maintenance alarms, maintenance tracking, training videos, a complete digital manual, production reporting, a 24/7 remote access option and much, much more.

"Our team has worked very hard to change the game of what customers now have available in a control interface. We have paired Cutting-edge design engineering with simple, operator-friendly features, to increase equipment effectiveness and create accountability at the machine level of maintenance staff. We are very excited to roll it out to all of our product lines." Says Bob Fesmire, President of Ellis.
