January 17, 2020

The Honorable Christine Elliott  
Minister of Health and Deputy Premier  
Hepburn Block 10th Floor  
80 Grosvenor Street  
Toronto, ON M7A 1E9

Dear Minister Elliott:

On January 16, 2020, the Windsor-Essex County Board of Health passed the following Resolution regarding the Children Count Pilot Project. WECHU’s resolution as outlined below recognizes that the Children Count Pilot Study Project, Healthy Living Module, is a feasible approach to fulfil local, regional and provincial population health data gaps for children and youth:

Windsor-Essex County Board of Health  
RECOMMENDATION/RESOLUTION REPORT – Children Count Pilot Project  
January 16, 2020

ISSUE

The behaviours initiated in youth create a foundation for health through the life course (Toronto Public Health, 2015). Supporting student achievement and improving overall quality of life for children and youth is a priority shared across multiple sectors, including health and education. Both the Ministry of Health and the Ministry of Education have identified the importance of this stage of development through the Ontario Public Health Standards (OPHS) and the Ontario Curriculum (2019), and the interrelationship between health, well-being and educational outcomes. Collecting, analyzing and reporting data at the local level is essential for the planning, delivery and evaluation of effective and efficient services that meet the unique needs of students and ensure the responsible public stewardship of the resources allocated to these services (Windsor-Essex, 2017). The lack of a coordinated provincial system for the assessment and monitoring of child and youth health that meets local needs has been the focus of many reports, including the 2017 Annual Report of the Ontario Auditor General. The Auditor General’s report identified that children are a public health priority population and that epidemiological data on children are not readily available to public health units for planning and measuring effective programming (Office of the Auditor General of Ontario, 2017).

In the initial report, Children Count: Assessing Child and Youth Surveillance Gaps for Ontario Public Health Units (Populations Health Assessment LDCP Team, 2017), public health units and school boards identified a need for local data related to mental health, physical activity and healthy eating for school-aged children and youth. In 2017, the Children Count Locally Driven Collaborative Projects (LDCP) Team convened a Task Force of leaders in education, public health, research, government and non-governmental organizations to explore solutions and make recommendations for improving assessment and monitoring of child and youth health. The Task Force recommendations have been endorsed by many organizations including the Council of Directors of Education (CODE) and Council of Medical Officers of Health (COMOH). In their report, the Children Count Task Force (Children Count Task Force, 2019) recommended building on existing infrastructure by using the Ministry of Education’s mandated school climate survey (SCS). The SCS provides population level data for children and youth grades 4 to 12 and represents a significant opportunity to understand local health needs of students.
BACKGROUND

In follow up to this previous work, the Children Count LDCP Team, with a renewal grant from Public Health Ontario (PHO), embarked upon The Children Count Pilot Study Project. The Children Count Pilot Study began in December 2017 with the goal to explore the feasibility of coordinated monitoring and assessment of child and youth health, utilizing the SCS, to address local health data gaps. This provincial project included six school board and public health unit pairings who developed and piloted a Healthy Living Module (HLM) as part of the school board’s SCS. The HLM covered the topics previously prioritized of mental health, healthy eating, and physical activity.

The objectives of the Pilot Study were:

1. To work collaboratively to develop a HLM for the SCS;
2. To pilot test and evaluate the applicability and feasibility of the partnership between public health units and school boards in coordinated monitoring and assessment utilizing the SCS; and
3. To develop a toolkit for implementation of coordinated monitoring and assessment for health service planning using the SCS for child and youth health in Ontario.

Using a Participatory Action Research (PAR) model, the steering committee (comprised of school board and public health leadership), worked together to build the HLM. The HLM was successfully integrated into the SCS led by participating school boards. Collaboratively school boards and local public health units analyzed and interpreted the results for knowledge sharing and planning.

The HLM enriched each school boards’ SCS and identified areas for further work to support student health and well-being. The process of piloting the HLM with multiple and diverse school boards using different methods demonstrated that the overall process of coordinating a HLM into the SCS is feasible and adaptable to suit local needs while still enabling consistency in data across regions. The Children Count Pilot Project captured the process and lessons learned in their final report (December 2019) as well as developed the Children Count Pilot Study Project: Healthy Living Module Toolkit as a guide for school boards and health units across the province.

PROPOSED MOTION

Whereas, boards of health are required under the Ontario Public Health Standards (OPHS) to collect and analyze health data for children and youth to monitor trends over time, and

Whereas, boards of health require local population health data for planning evidence-informed, culturally and locally appropriate health services and programs, and

Whereas, addressing child and youth health and well-being is a priority across multiple sectors, including education and health, and

Whereas, Ontario lacks a single coordinated system for the monitoring and assessment of child and youth health and well-being, and

Whereas, there is insufficient data on child and youth health and well-being at the local, regional and provincial level, and

Whereas, the Children Count Pilot Study Project, Healthy Living Module is a feasible approach to fulfill local, regional and provincial population health data gaps for children and youth, and

Now therefore be it resolved that the Windsor-Essex County Board of Health receives and endorses the Healthy Living Module, and
FURTHER THAT, the Windsor-Essex County Board of Health encourage the Ministry of Health and the Ministry of Education to adopt the Healthy Living Module as part of the Ontario Public Health Standards and the Ontario School Climate Survey.

References

We would be pleased to discuss this resolution with you and thank you for your consideration.

Sincerely,

Gary McNamara
