Re: Provincial Opioid Crisis Response

Dear Minister Elliott:

At its meeting on April 13, 2022, the Board of Health for Peterborough Public Health (PPH) considered correspondence from the Simcoe Muskoka District Health Unit and passed the following motion:

*That the Board of Health for Peterborough Public Health:*
  - receive the letter dated March 16, 2022 from Simcoe Muskoka District Health Unit (SMDHU) for information;  
  - endorse the following actions recommended by SMDHU:
    1. Create a multi-sectoral task force to guide the development of a robust provincial opioid response plan that will ensure necessary resourcing, policy change, and health and social system coordination.  
    2. Expand access to evidence informed harm reduction programs and practices including lifting the provincial cap of 21 Consumption and Treatment Service (CTS) Sites, funding Urgent Public Health Needs Sites (UPHNS) and scaling up safer opioid supply options.  
    3. Explore revisions to the current CTS model to address the growing trends of opioid poisoning amongst those who are using inhalation methods.  
    4. Expand access to opioid agonist therapy for opioid use disorder through a range of settings (e.g. mobile outreach, primary care, emergency departments), and a variety of medication options.  
    5. Provide a long-term financial commitment to create more affordable and supportive housing for people in need, including people with substance use disorders.  
    6. Address the structural stigma and harms that discriminate against people who use drugs, through provincial support and advocacy to the Federal government to decriminalize personal use and possession of substances and ensure increased investments in health and social services at all levels.  
    7. Increase investments in evidence-informed substance use prevention and mental health promotion initiatives that provide foundational support for the health, safety and well-being of individuals, families, and neighbourhoods, beginning from early childhood.  
  - communicate this support by writing to Minister Elliott, with copies to the following: Associate Minister of Mental Health and Addictions, Attorney General of Ontario, Chief Medical Officer of Health, Local MPs and MPPs, Local Councils, Ontario Health, Association of Local Public Health Agencies, and Ontario Boards of Health.
The harms related to opioid use have increased at an unprecedented and alarming rate in Peterborough County and City, currently double the provincial average and since the onset of the COVID-19 pandemic. To address this opioid crisis, a provincially supported and coordinated, multi-sectoral approach is needed.

The approach should address the social determinants of health and include early prevention and harm reduction strategies alongside substance use disorder treatment strategies. The public health response should also include policy to address the structural stigma and harms that discriminate those who use drugs.

The PPH Board of Health fully supports the above-noted recommendation, and thanks you for your consideration.

Respectfully,

*Original signed by*

The Honourable Christine Elliott
Minister of Health
House of Commons
Ottawa, ON K1A 0A6

Dear Minister Elliott:

Re: Response to the Opioid Crisis in Simcoe Muskoka and Ontario-wide

On March 16, 2022, the Simcoe Muskoka District Health Unit (SMDHU) Board of Health endorsed a set of provincial recommendations to help address the ongoing and escalating opioid crisis experienced within Simcoe Muskoka and province-wide. Despite regional activities in response to the opioid crisis, there remains an urgent need for heightened provincial attention and action to promptly and adequately address the extensive burden of opioid-related deaths being experienced by those who use substances.

In the 19 months of available data since the start of the pandemic (March 2020 to September 2021) there have been 245 opioid-related deaths in Simcoe Muskoka. This is nearly 70% higher than the 145 opioid-related deaths in the 19 months prior to the start of the pandemic (August 2018 to February 2020), when our communities were already struggling in the face of this crisis. The first nine months of 2021 saw an opioid-related death rate more than 33% higher than the first nine months of 2020, suggesting the situation has not yet stabilized.

As such, the SMDHU Board of Health urges your government to take the following actions:

1. Create a multisectoral task force to guide the development of a robust provincial opioid response plan that will ensure necessary resourcing, policy change, and health and social system coordination.
2. Expand access to evidence informed harm reduction programs and practices including lifting the provincial cap of 21 Consumption and Treatment Service (CTS) Sites, funding Urgent Public Health Needs Sites (UPHNS) and scaling up safer opioid supply options.
3. Explore revisions to the current CTS model to address the growing trends of opioid poisoning amongst those who are using inhalation methods.
4. Expand access to opioid agonist therapy for opioid use disorder through a range of settings (e.g. mobile outreach, primary care, emergency departments), and a variety of medication options.
5. Provide a long-term financial commitment to create more affordable and supportive housing for people in need, including people with substance use disorders.
6. Address the structural stigma and harms that discriminate against people who use drugs, through provincial support and advocacy to the Federal government to decriminalize personal use and possession of substances and ensure increased investments in health and social services at all levels.
7. Increase investments in evidence-informed substance use prevention and mental health promotion initiatives, that provide foundational support for the health, safety and well-being of individuals, families, and neighbourhoods, beginning from early childhood.

The SMDHU Board of Health has endorsed these recommendations based on the well-demonstrated need for a coordinated, multi-sectoral approach that addresses the social determinants of health and recognizes the value of harm reduction strategies alongside substance use disorder treatment strategies, as part of the larger opioid crisis response. Evidence has shown that harm reduction strategies can prevent overdoses, save lives, and connect people with treatment and social services. Further, there is an urgent need to change the current Canadian drug policy to allow a public health response to substance use, through decriminalization of personal use and possession paired with avenues towards health and social services, as our Board called for in 2018. These recommendations collectively promote effective public health and safety measures to address the social and health harms associated with substance use.

Sincerely,
