RE: Support for a Local Board of Health

Dear Minister Elliott,

As the province of Ontario and Public Health Unit's across the province continue to respond to the COVID-19 pandemic, the City of Hamilton's Board of Health has been reflecting on our local pandemic response. COVID-19 has highlighted the importance of public health local responsiveness, particularly when dealing with local outbreaks. During the past eighteen months we have seen how local knowledge and partnerships has strengthened the pandemic response by better understanding the needs in the community and leveraging trusted relationships. The strength, timeliness, and flexibility of local collaboration can be seen through the implementation of various strategies, including increased public health measures, equitable access to COVID-19 testing, and an extremely complex and targeted vaccination strategy.

We are writing this letter to reiterate our position that a local, rather than regional governance is preferred to inform planning on how to strengthen and modernize the public health system. One of the current strengths of the governance system in Hamilton is the ties to the municipal sector which has a direct influence on opportunities for health where people live. As a governing body, the Hamilton Board of Health / Council can remain flexible and make decisions to increase, decrease or change service delivery based on local need. This has been particularly important throughout the pandemic as regular public health programs had to be flexible with the level of their operations to allow for resources to be shifted to essential services and the COVID-19 response. Maintaining the local voice supports ongoing advocacy of local need to ensure that priorities in the community are met, for example, the collection of local Social Determinants of Health Data which has allowed public health efforts to more effectively reach those who are disproportionately affected by the pandemic.
It is believed that if there is a shift to a regional board of health model, there will be a reduced local leadership voice in decision making. Due to this, it is important that public health governance remains local while ensuring accountability to municipalities, the province and the local population. Leveraging local responsiveness during the pandemic has reinforced our position that a local rather than regional governance remains the preferred model.

Sincerely,

Fred Eisenberger
Mayor
