Before *West Side Story*: Leonard Bernstein’s Boston
(Music 194)
Professors: Carol J. Oja and Kay Kaufman Shelemay
Teaching Fellow: Emily Abrams

**Requirements**

**Emails:** coja@fas.harvard.edu, shelemay@fas.harvard.edu, abrams@fas.harvard.edu

**Office hours:** Professor Oja and Professor Shelemay: 3-4pm on Wednesdays. Emily Abrams: 10-11am on Wednesdays.

**Course description:** This seminar will explore the childhood and early career of one of the 20th century's most renowned musicians and composers. Working in teams, students will fuse ethnography and archival research to explore the interlinking communities and institutions that shaped Bernstein's formative years. These include, but are by no means limited to, Congregation Mishkan Tefila in Newton, Boston Latin High School, Harvard (class of ’39), and the BSO.

Together, we will be launching a major collaborative research project. As a result, the expectations and work flow will differ greatly from the usual seminar. Instead of focusing on exams or individual research papers, “Leonard Bernstein’s Boston” involves lots of strategizing and working in groups. In other words, it requires a consistent time commitment and regular maintenance over the course of the semester, and it can only be successful if everyone pitches in at a steady pace. Regular attendance is essential. We will be functioning as a team, which means that it is crucial for everyone to be cooperative and collegial. All students will work on two levels: (1) preparation of and participation in class interviews and discussions, and (2) out-of-class research projects, pursued individually or in teams. There will be no midterm, final exam or traditional research paper. Graduate students will have additional requirements, which will be more clearly defined as the project unfolds.
Our seminar has been devised to dovetail with “Celebrating Leonard Bernstein,” an international festival and conference, scheduled for Harvard, October 12-14, 2006. Individual students will be identified from the seminar to help prepare an exhibit for the conference over the summer and to give presentations at that event. Beyond that, we expect to uncover exciting original materials, both in the oral tradition and in archival sources, which may pave the way for future research. Depending upon what we find, there may be possibilities for team publications or projects yet-to-be-imagined.

In other words, this is a course in which you can spread your wings and take chances. You will leave with a solid set of research skills, and, depending on your ingenuity and industry, you might find yourself with an enticing project that will carry into the future.

**Required readings**

[*Available at the Coop for purchase.]*

**Grading**

- 20% class and activity participation, including one written response to the readings and listening
- 20% conducting class interviews and completing interview transcripts (*the latter prepared promptly and posted on our website*), also leading/participating in class discussion, when assigned to do so
- 20% journal entries, which should be turned in at midterm and the end of term
- 20% research project in one of the six areas defined in the introductory course materials; this can be done individually or in teams; it will include archiving all original data on the class website, whether interview transcripts, notes from primary sources, or xeroxes of sources (which need to be scanned and loaded on the website).
- 20% final oral presentation about the research project (likely with team), which will share findings and analyze method
Journals/Field Notes
All students must keep a digitized journal of their experiences in the class, to be handed in twice during the semester. This material should include personal responses to all in-class interviews and class excursions. Critiques should be shaped on multiple levels, including interactions among class members and interview subjects, responses to what was said and what was avoided, interview subject’s body language and other cues to content, and evaluation of how the interviewing went (that is, in terms of technique, exploring such questions as whether the interviewees were allowed to speak freely). Guidelines to participant observation and interview technique will be discussed and distributed during the first class session.

Preparation for In-Class Interviews
In order to make the in-class interviews a truly collaborative process, all students will post ideas and questions for that week’s interview by the Saturday before class, at 5 pm. The cluster of students conducting that interview will then work those ideas into their questions. It is essential to have done the week’s reading and listening before posting these suggestions.

Transcripts of Class Interviews
Complete transcripts need to be completed by the team conducting the interview and posted on the class site by the next Monday. The work should be divided fairly among team members. At the end of the transcript, team members should add comments about what went well, what didn’t, and why, as well as areas that should be followed up.

Websites
Our course website (accessible through my.harvard.edu) will house streaming audio of listening examples, blogs for teams and for the class as a whole, facilities to upload (and playback) video and audio files of interview and their transcriptions, tips on interviewing and permissions, plus a large number of research materials, including images of items in the Library of Congress, lists of possible research projects, and other online, local, and national resources for Bernstein research.

Acknowledgements
This course has been generously funded from the following Harvard sources: Innovation Fund of the Faculty of Arts and Sciences, Center for Jewish Studies, Graduate School of Arts and Sciences, Bok Center Pilot Project in Community-Based Learning.
We are grateful to many people for helping with ideas and information about Bernstein’s Boston years, especially the Bernstein family, Craig Urquhart and Marie Carter of the Leonard Bernstein Office, and Mark Eden Horowitz of the Music Division, Library of Congress.
