Course Overview: The **Swiftwater Rescue** workshop teaches recognition and avoidance of common river hazards, execution of self-rescue techniques, and rescue techniques for paddlers in distress. Emphasis is placed both on personal safety and on simple, commonly used skills. Fundamental and more advanced techniques for dealing with hazards that carry greater risks for both victim and rescuer, such as strainers, rescue vest applications, entrapments, and pins, are also practiced. Scenarios will provide an opportunity for participants to practice their skills both individually and within a team/group context.

Course Objectives:
- Promote proactive prevention of river accidents and injuries.
- Develop and practice key self-rescue skills.
- Identify and avoid river hazards by understanding hydrology, hazards, and river features.
- Focus on fast, low-risk strategies for early management of river accidents.
- Develop and practice methods for recovering swimmers, and loose boats and equipment.
- Develop and practice more advanced rope-based and in-water skills.
- Gain experience using the rescue PFD, and understand its strengths and weaknesses.
- Utilize rescue scene management principles needed within a paddling group.

Essential Eligibility Criteria (EEC):
ACA courses are open to all individuals who acknowledge the ability to perform the following essential eligibility criteria.

1. Breathe independently (i.e., not require medical devices to sustain breathing)
2. Independently maintain sealed airway passages while under water
3. Independently hold head upright without neck / head support
4. Manage personal care independently or with assistance of a companion
5. Manage personal mobility independently or with a reasonable amount of assistance
6. Follow instructions and effectively communicate independently or with assistance of a companion
7. Independently turn from face-down to face-up and remain floating face up while wearing a properly fitted life jacket*
8. Get on / off or in / out of a paddlecraft independently or with a reasonable amount of assistance*
9. Independently get out and from under a capsized paddlecraft*
10. Remount or reenter the paddlecraft following deep water capsizes independently or with a reasonable amount of assistance*
11. Maintain a safe body position while attempting skills, activities and rescues listed in the appropriate Course Outline, and have the ability to recognize and identify to others when such efforts would be unsafe given your personal situation*

*To participate in adaptive programs, participants must acknowledge only the first six EEC listed above. Entry-level adaptive programs will involve teaching and practicing EEC #7-11.*

Course Prerequisites: All paddle craft are welcome. Boaters should be able to competently maneuver their craft in Class I-II rapids. However, all boaters, and non-boaters with an interest in swiftwater rescue (e.g., professional rescuers), will benefit from the class. Participants should be in good health and overall fitness, possess solid swimming ability, and be comfortable swimming in moving current during river drills. Participants should dress appropriately for weather and temperature and expect to be in the water for extended periods of time.

Minimum personal equipment for class: PFD designed for whitewater use, whitewater helmet, protective clothing suitable for extended swimming in cold water, protective footwear, boat, paddle, whistle, throw rope, 15+ feet of one inch tubular nylon webbing, 2 locking carabiners, and 2 prusick loops.

Course Duration: Two or more days (16+ hours)
Course Location / Venue: A chute of water with deep, clean wave action, well-defined eddy lines and no immediate
hazards or risks below. Ideally, the site should contain class II rapids, although it may be taught on less difficult rapids. Protected space is needed for on-land work, with adequate shelter for inclement weather.

**Succeeding courses:**
Level 5: Advanced Swiftwater Rescue

**Class Ratio:** 12 Students: 1 Instructor; with an additional instructor the ratio can be 24: 2

The following is a general summary of course content for the Level 4: Swiftwater Rescue course. Safety and Rescue Instructors should use this document as a general guide for conducting programs. Depending on the program, specific content points might be studied and practiced in depth, briefly reviewed, or skipped entirely. Specific program content should be adjusted as necessary to accommodate student skills, goals and experience, as well as weather and water conditions during the program.

Definitions of key terms and skills can be found in the ACA River Safety & Rescue Terminology Handbook.

**Introduction, Expectations, & Logistics:**
- Welcome, introductions, paperwork
- Student & instructor course expectations and limitations
- Course itinerary & site logistics
- Review waiver, assumption of risk, challenge by choice, medical disclosure
- About the ACA
- PFD policy (always wear on water)
- Appropriate personal behavior
- No alcohol / substance use
- Proper etiquette on & off the water

**Personal Preparation:**
- Personal ability
- Swimming ability
- Water comfort & confidence
- Fitness, conditioning, and warm up
- Safe paddle and boat handling
- Safety and rescue considerations
- Personal equipment (reviewed by Instructor)

**The Paddling Environment**
- Weather conditions and forecasts
- International scale of river difficulty
- Characteristics of current
- River levels and streamflow (CFS)
- Subjective vs. objective hazards
- Effective river/rapid scouting strategies
- River features & hazards:
  - Downstream and Upstream V’s/chutes
  - Eddies and Eddy Lines
The Paddling Environment (continued)
  o Waves/Wave Holes
  o Holes/Hydraulics
  o Ledges / Horizon lines
  o Strainers: types, typical locations
  o Rocks/Pillows
  o Cold water immersion/response
  o Dams / Flow Diversion Structures / Pipelines
  o Undercut Rocks / Ice
  o Flush drowning

Personal Paddling Equipment (PPE)
  • Helmet
  • PFD
  • Footwear
  • Craft & Paddle
  • Thermal Protection
  • Accessories: Knife, whistle, food, etc.
  • Craft specific PPE (i.e. SUP leashes)

Personal Rescue Equipment (PRE)
  • Tubular webbing
  • Locking carabiners
  • Throw Rope
  • Pulleys
  • Prusik Loops
  • Specialized Rescue Equipment
    o Line Capture Devices
  • Survival Equipment
  • Quick Release Harness System
    o Parts, applications, advantages, disadvantages, and hazards
    o Common causes of QRHS failure and prevention strategies
    o Threading options for tri-glide
    o Buddy checks for QRHS
  • Rescue Tethers: parts, applications, advantages, disadvantages, and hazards
    o Strategies to prevent entrapment: proper stow points & acceptable attachment options for carabiners

Rescue Strategy
  • Personal Preparation: Swimming ability, Confidence, Fitness & Conditioning
  • Strategies to prevent or minimize incidents
  • Trip organization and planning principles: Float plans, emergency action plans
  • Communication: Hand/paddle and whistle signals
  • C.L.A.P. - Communication, Line of Sight, Avoidance, Position of Maximum Usefulness
  • Incident Timeline
  • Rescue Priorities
Rescue Strategy (continued)

- Responsibilities of swimmer/subject
- Phases of rescue:
  - S.T.O.P - Stop, Think, Observe, Plan
  - L.A.S.T - Location, Assess/Access, Stabilize, Transport
- Rescue Management: Leadership, Safety, Rescuers, Subject (stable & unstable)
- Establishing Acceptable Level of Risk: Can I [do this]? Should I [do this]?
- Liability Issues: duty to act, breach of duty, harm, standard of care, abandonment
- Ethical Issues: moral vs. legal obligations
- Medical Issues & Considerations
- Importance of Fitness & Conditioning
- Rescue strategies for common river scenarios:
  - Swimmer with/without equipment in current
  - Paddlers & Equipment on rocks in current
  - Boat pins with/without paddler
  - Entrapment
  - Unaccounted for paddler

Wading Skills

- Causes and prevention of foot entrapment
- Formal vs. informal wading techniques
- Factors that affect success in wading: depth, force, composition of river bottom, number of waders, etc.
- Strengths, limitations, advantages, disadvantages, and risks of wading techniques
- Four-point Crawl
- Single Person Assisted Wade
- Two-Person Wade
- Line Astern Wade
- Wedge Wade
- Line Abreast Wade
- Fence Wade
- Tethered wading techniques
- Direct Line Crossing
- Wading Applications for foot/boat entrapments

Swimming Skills

- Strategies to minimize risk of foot entrapment
- Techniques for successful exits from current to eddys
- Defensive swimming position
- Aggressive swimming position
- Defensive to aggressive transitions
- Ferry techniques: defensive and aggressive swimming
- Self-Rescue: swimming with equipment
- Swimming techniques for: waves, hydraulics, and drops
- Strategies to conserve energy: short aggressive sprints, “porpoising” for in-water scouting, appropriate timing, etc.
Swimming Skills (continued)
- Managing holes and drops
- Swiftwater entries: in & out of water starting positions
- Techniques for successful downstream swim of a rapid
- Strategies for handling strainers: aggressive swim in and over and log walk
- Non-tethered Swimming Rescue (Contact Rescues)
- Tethered Rescue Swimming
- Direct Line Lower of rescuer

Throw Rope Skills
- Characteristics of throw ropes: rope diameter, length, construction material, and bag design
- Rope management & safety strategies
- Rope care
- Rope hazards
- Throwing and recovery zones
- Factors impacting throw accuracy and success: stationary and moving targets
- Single person throw rope techniques: underhand, overhand, and sidearm
- Two-person throw bag techniques: split bag toss
- Bag re-stuffing techniques
- Advantages and disadvantages: bag and coil throwing techniques
- Rope coiling methods and throw techniques: butterfly and coil
- Rope receiving techniques
- Communication with swimmers
- Techniques for handling multiple swimmers
- Vectors pull to assist with landing swimmers
- Belay techniques:
  - Hip belay, seated belay, and back-up belay
  - Dynamic and friction belay
- Pendulum use for crossing current
- Line ferrying techniques:
  - Boats
  - Tethered swimmers
  - Messenger lines

Rigging Skills
- Knots: components of good knots, dressing, terminology, strengths, and limitations
- Tie and properly dress:
  - Figure 8 Family: standard, on bight, follow-through, Flemish bend
  - Overhand Family for webbing: Overhand on a bight, overhand bend
  - Double Fisherman
  - Prusik Hitch
  - Munter Hitch
  - Clove Hitch
  - Butterfly Knot
Rigging Skills (continued)

- Anchors:
  - Components of solid anchor points
  - Terminology
  - Advantages, and disadvantages of anchor types
  - Characteristics of self-equalizing and load distributing anchors
  - Planning for anchor failure
  - One-point Anchors: Friction Wrap, 3 Bight, Single Loop, Wrap 3 - Pull 2
  - Two-Point Anchors
- Mechanical Advantage:
  - Applications of MA in the rescue environment
  - Risk management strategies: Scene Management, Dampeners
  - Characteristics of Simple and Compound Systems
  - Simple Systems: 2:1 & 3:1

Craft Pins

- Pin mechanics
- Types of craft pins
- Boat-based techniques for pins
- Stabilization, Haul, and Control Lines
- Strong Arm Method
- Vector Pull
- Progressive Vector Pull
- 1:1 with change in direction
- Craft Specific Anchors (e.g. creating anchors on specific craft)
- Craft-specific Techniques: Hull Wrap for Rotation, Raft specific techniques, etc.

Craft-based Rescues

- Advantages and disadvantages during rescues of various crafts: canoe, kayak, SUP, raft, prone kayak, river boards
- Paddle recovery options
- Strategies for boat recovery
- Self-Rescue: swimming with equipment
- Swimmer tow options
- Swimmer re-entry/re-mount techniques
- Craft bumping/bulldozing
- Craft towing (with and without QRHS and rescue tether)
- Craft specific rescues
- Unresponsive Paddler Rescue
- Tethered Craft Rescue
Level 4: Swiftwater Rescue
(Sample Skills Course)

Strategies & Skills for Entrapments
• Stabilization & Control Lines
• Snag Lines
• Cinches
  o Characteristics of open, closed, and irreversible cinches
  o One-Bank Cinches (Kiwi & U cinch)
  o Two-Bank Cinches (Simple Cinch)
• Application of cinches for paddler, swimmer, equipment, and/or boat entrapments

Scenarios
• Simulated rescue skill sessions and scenarios will be used throughout the course to:
  o Model and utilize effective risk management and rescue strategies
  o Highlight essential skills for the course level and venue
  o Increase skill and experience level of students
  o Maximize learning outcomes for all students

Conclusion & Wrap-Up:
• Group debrief / Individual feedback
• Course limitations
• Importance of First Aid/CPR and Wilderness First Aid
• Importance of additional instruction, practice, experience
• Life sport / Paddling options
• Local paddling groups / Clubs
• Handouts / Reference materials
• ACA Membership forms
• Course evaluation
• Participation cards
