

## **Virtual Student Poster Session at the AAC Virtual Anodizing Conference**

### **Poster Guidelines**

Posters will be presented October 15, 2020 at 9:00 a.m. Central Time. Students will be expected to present their power point live and explain their research. Judging will take place that day. Students will be allotted approximately seven minutes to describe the work to the judges.

- Power points should include a maximum of four slides. No penalty needed for being able to communicate in 2-3 slides.
- Keep power points simple and should be self-explanatory. It is a quick overview of your research and should encourage viewers to ask questions.
- Illustrations should be simple and bold.
- Neutral colored backgrounds are more pleasing to the eye than bright-colored backgrounds.
