HAVE QUESTIONS ABOUT BASIC REQUIREMENTS FOR RESIDENCY TRAINING PROGRAMS AND BOARD CERTIFICATION...READ ON...

Revisions to the basic requirements for residency training programs in dermatology require trainees to submit two (2) manuscripts for each year of training or a total of six (6) papers to the chairman of the AOCD Education Evaluation Committee, Dr. James Bernard. These requirements are in effect for all trainees who began their training after February, 1983.

Trainees may request information on board certification from the secretary-treasurer of the AOBD, Dr. Thomas Bonino, ninety (90) days prior to completion of their training, however, they may not sit for the board examination until the AOA Board of Trustees has approved the third and final year of training. (The timetable for this is approximately 1½ years after completion of training.)

Members who graduated prior to 1946 and who did not complete an approved dermatology training program, but had at least one (1) year of dermatology training, may be eligible for "grandfather certification." Detailed training documentation must be submitted to Dr. Bonino for evaluation by the AOBD. At that time an opinion will be rendered as to whether the training qualifies for special consideration. More information on Board Certification may be found on page 600 of the 1984-85 AOA Yearbook and Directory.
