NO!! This is no longer a requirement.

Instead of the pre and post test questions, there will be 2 or 3 general questions such as

1. “I will make the following changes based on what I learned”
2. “Identify how you will change your practice as a result” (and there will be choices to choose from.)
3. “I will share what I learned with….”

As a requirement to maintain our accreditation with the AOA and the ACCME, the AOCD **MUST** conduct Outcomes Measurements which we are required to submit to both the AOA and the ACCME. PLEASE help the AOCD by completing these questions.

“An Outcomes Measurement of the effectiveness of a program shall be conducted. No CME shall be awarded for this activity. This can be conducted by survey following the program or by a simple question or a series of questions such as, “List at least one thing you learned from this activity”; or “will you implement anything learned from this activity into your practice? If so, what and how? If not, why or why not?” as a component of your program evaluation.”
