### DESCRIPTION & OBJECTIVES

The American Osteopathic College of Radiology, “Breast Imaging Innovations Conference,” is designed for radiologists who interpret breast imaging as well as breast imaging specialists. Content will include new technological advances and interventional procedures in the management of breast diseases.

This course includes 16 credits in mammography that will satisfy the following MQSA and ACR accreditation requirements:

- Re-establishing continuing experience requirements of the MGSA
- Continuing education requirements for stereotactic breast biopsy
- Continuing education requirements for ultrasound-guided breast biopsy
- This course meets the eight hours of initial training in breast tomosynthesis as required by the FDA

In addition, this course will include 9 hours of PET/Nuclear Medicine lectures and will offer interventional workshops in breast ultrasound and stereotactic biopsy.

At the conclusion of this CME Activity the participants will be able to:

- Recognize the importance of breast screening and be able to discuss the controversy surrounding screening
- Demonstrate efficiency in tomosynthesis and transverse research findings on tomosynthesis into daily clinical practice
- Demonstrate proficiency in a variety of breast biopsy techniques
- Identify the appropriate use for MRI for screening and diagnostic evaluation as well as MRI guided biopsy
- Determine the needs of the breast surgeon to use in clinical practice working in a multidisciplinary environment
- Manage challenging breast imaging cases and pathology
