Dear Colleagues,

On behalf of the American Osteopathic College of Radiology, I would like to invite you to join us for a unique and innovative program, the 2014 Annual Convention, “Multidisciplinary Approach to Oncology.” Our conference will be held at the Omni San Diego Hotel, a AAA four-diamond award hotel, located in the heart of the historic Gaslamp Quarter, close to the city’s top sites and attractions.

The five-day CME event will bring together up-to-date information regarding the diagnosis and treatment of the oncologic patient, as given from the perspectives of diagnostic and interventional radiologists, oncologic surgeons, and a radiation oncologist. By integrating these disciplines, we hope to broaden our participants’ understanding of the primary cancers affecting various organ systems, their pathology, the imaging manifestations, and the treatment options. The event is designed to provide participants with state-of-the-art information given by national leaders and experts in their fields. Each morning and afternoon a different organ system and its primary oncologic issues will be discussed followed by a panel discussion between our experts and the audience.

On Wednesday evening, there will be an awards ceremony and reception that is open to all conference participants and their families. A continental breakfast will be provided each morning for registrants.

On Wednesday evening, there will be an awards ceremony and reception that is open to all conference participants and their families. A continental breakfast will be provided each morning for registrants.

Our conference will be held at the Omni San Diego Hotel, a AAA four-diamond award hotel, located in the heart of the historic Gaslamp Quarter, close to the city’s top sites and attractions. The Gaslamp Quarter in world famous for its atmosphere. In a variety of auctions and its surpiseful eating establishments, Explore Balboa Park, home a famous city with a Padres bowl game at PETCO Park Stadium, connected to the hotel via a pedestrian skywalk.

The conference dates and times have been chosen to enable you to bring your family to San Diego at the perfect time to enjoy the spring weather, and the local attractions. The Gaslamp Quarter is world famous for its atmosphere. In a variety of auctions and its surpiseful eating establishments. Explore Balboa Park, home a famous city with a Padres bowl game at PETCO Park Stadium, connected to the hotel via a pedestrian skywalk.

Educational Objectives

Upon completion of this course the participant should be able to:

• Recognize and understand the importance of PET imaging and its role in oncology.
• Understand the role of nuclear medicine procedures for alleviation or improvement in patients’ pain.
• Understand and increase awareness of the role of radiation oncology in the treatment and palliation of patients’ disease.
• Improve protocols for efficient patient management.
• Provide more concise, efficient and tailored reports based on increased awareness of the needs of the oncologic surgeon and radiation oncologists.
• Recognize and understand the importance of PET imaging and its role in oncology.
• Understand the role of nuclear medicine procedures for alleviation or improvement in patients’ pain.
• Understand and increase awareness of the role of radiation oncology in the treatment and palliation of patients’ disease.
• Improve protocols for efficient patient management.
• Provide more concise, efficient and tailored reports based on increased awareness of the needs of the oncologic surgeon and radiation oncologists.

Course Description

The 2014 Annual Convention, “Multidisciplinary Approach to Oncology,” sponsored by the American Osteopathic College of Radiology is intended for general diagnostic radiologists, interventional radiologists, neuroradiologists, musculoskeletal radiologists, body imagers, oncologic surgeons, radiation oncologists, neuroradiologists, interventional radiologists, pediatric oncologists, and pediatric radiologists, and all other professionals dealing with pediatric oncology patients. This conference brings together national leaders and experts in their fields to discuss current diagnostic and treatment options in oncology.

The five-day CME event will bring together up-to-date information regarding the diagnosis and treatment of the oncologic patient, as given from the perspectives of diagnostic and interventional radiologists, oncologic surgeons, and a radiation oncologist. By integrating these disciplines, we hope to broaden our participants’ understanding of the primary cancers affecting various organ systems. Panel discussions include both adult and pediatric patients and will be presented from the perspectives of oncologic surgeons, radiologists, interventional radiologists, and a radiation oncologist. There will be a question and answer period following each panel presentation. Interested with the panel discussions will be additional radiologic presentations of solid organ tumors not already discussed by the panels.

Multidisciplinary Approach to Oncology

April 28-May 2, 2014
Omni San Diego Hotel • San Diego, CA

Offering 36 CME Credits and 2 SAMs

Ronald D. Alexander, II, DO, FAOCR, Program Chair
