President Address

It is truly an honor to serve as the 69th President of the AOCR. This College has provided me so many opportunities – more than I could ever repay, so I am grateful for the chance to try to give something back.

It is only fitting that we dedicate this coming year to the memory of Susann Schetter, DO, FAOCR. The AOCR meant the world to Susann, and this was her year to be President, until her untimely passing. She is sorely missed, especially by those who were blessed to have known and worked with her, but she certainly will never be forgotten.

Working in an academic setting, I attend several meetings each year, but I most look forward to attending those put on by the AOCR. The quality of the educational content is undeniably exceptional, but it is the collegiality and relationships within the AOCR that bring me back time and time again. This type of environment is something that may be easily taken for granted as simply part of our culture; but, it is time that we reflect on what the AOCR means to us and share that amongst our colleagues, especially those who are in training or just beginning their radiology careers.

The culture of the AOCR is something that is readily apparent to visiting faculty at our CME meetings. Year after year, our allopathic colleagues rave about the welcoming nature of the AOCR, as well as how engaged attendees are at our annual and mid-year scientific meetings. One renowned visiting faculty recently commented that the AOCR is the ‘best kept secret in radiology’. That is no doubt a fair assessment; however, I have never been very good at keeping secrets.

For this coming year, my main goals are to increase visibility of the AOCR throughout the radiology community and further engage early career radiologists, fellows, and residents, who truly represent the future of our College. We have so many intelligent, enthusiastic, and energetic junior members that have expressed interest in becoming actively involved that it would be a crime not to find ways to utilize their collective talents. To that end, the Board of Directors has approved formation of a Committee for Social Media and Member Engagement to be run by early career radiologists and trainees.

The committee will advertise upcoming CME events (on-demand, webinars, and meetings), post updates and educational content during live CME meetings, share important highlights for the College and its active members, and develop and post recurring educational content…continued on page 3

In this Issue

Thank you for this opportunity William O’Brien, D.O., former editor-in-chief, and thank you Daniel Wale, D.O., current editor-in-chief, for your guidance and support on this issue. A unique dual-institution collaboration between my former radiology residency institution, Cooper University Hospital in Camden, NJ, and my fellowship institution, Thomas Jefferson University Hospital in Philadelphia, PA, where I am a breast imaging fellow, resulted in the production of this Reproductive Imaging issue of JAOCR. The strengths of these two institutions and their esteemed faculty have contributed to the foundation of my early radiology career.

For most women, reproductive years represent a happy and joyful period in their lives. However, pregnancy and postpartum are not without risks and complications that affect not only the livelihood of a young woman but her family as well. Specifically, pregnancy is a vulnerable period in a woman’s life, which can lead to significant morbidity and mortality. Imaging evaluation plays a crucial role in evaluation and diagnosis of common disease processes seen during this important time period. This issue includes imaging evaluation of breast, renal, thyroid, genitourinary and obstetrical disease processes encountered during pregnancy and lactation.

My advisors and mentors have pushed me to reach my potential and taught me to give back to those that follow in my footsteps. As such, I have sought out residents from my residency and fellowship institutions as first authors and co-authors for all of the articles in this issue. I would like to express my appreciation and gratitude to all the authors for their time and dedication in creating this issue. I hope that this opportunity will inspire trainees to mentor those that follow them and contribute to the advancement of our field.

I would like to thank everyone who has supported me on this winding training path at Cooper University Hospital and Thomas Jefferson University Hospital, especially Pauline Germaine, D.O., and Robyn Roth, M.D., who have fostered my clinical and research interests in women’s imaging. I am fortunate for my roots and will be staying local to serve the South Jersey community as a breast and body radiologist at Atlantic Medical Imaging. I would like to thank my family, particularly my husband, Gautam, for his continued support and patience as I have spent countless hours expanding my clinical and research interests in women’s imaging.

Chandni Bhimani, DO
Breast Imaging Fellow
Thomas Jefferson University Hospital
Philadelphia, PA
across various social media platforms. The end result will be increased visibility of the AOCR, which will be especially vital in reaching out to trainees under the single accreditation system.

One thing I would ask from all of us for this coming year (and beyond) is that we strongly advocate for the College – whether it be through introducing new members to the AOCR, volunteering service on committees, providing content for our numerous CME offerings, or simply supporting and attending our meetings. If we all advocate for the AOCR at the local level, there is no doubt that we will continue to grow our extraordinary College. Time has come to start sharing the ‘best kept secret in radiology’.

Thank you and I look forward to working with – and more importantly for – you over this next year.

Fraternally,

William T. O’Brien, Sr., DO, FAOCR

Welcome New Board Members

April Cox, DO
Clinical Radiologists | Springfield, IL

Call for Abstracts!
Submission open to all practicing radiologists and trainees

Now accepting abstracts for the 2020 Annual Convention, Imaging the Acute & Critical Patient in Tampa, Florida, May 4-8, 2020! Exhibits selected for presentation meet ACGME residency requirements for scholarly activity. View the new AOCR Educational Exhibit Guidelines for full details on the submission process.

Submission Categories
Scientific Exhibits
Educational Exhibits

Deadlines
Abstract Submission - September 15
Final electronic exhibit - January 15

Eligibility
• Trainees & Practicing Physicians
• Trainees must have one or more supervising faculty named on submission
• Accepted abstracts must have designated representative present at AOCR Annual Convention

Course Information
This CME activity is intended to provide the target audience with an overview in the updates in the cross sectional imaging arena. MR/CT/US Imaging and its current role of common disease detection and management will be discussed. Common disease processes and their imaging evaluation techniques will be reviewed. Selected topics in the latest musculoskeletal treatments developed with imaging guidance and interventional techniques will be presented. A special emphasis on the pediatric population will be presented as well.

In addition, a special 2-hour lecture on medical malpractice as it relates to the practice of radiology through an actual case vignette will be presented with discussion.

Objectives
Upon the conclusion of this activity, participants should be able to:

- Demonstrate their knowledge of new imaging techniques, diagnoses and protocols.
- Enhance their understanding of the use and limitations of PET/CT as it relates to infection and inflammation.
- Apply ultrasound to musculoskeletal, pediatric brain, spine, liver and kidney organ systems, and its use in treatment of various disease entities.
- Effectively use MDCT and MR imaging to evaluate congenital heart disease, Cardiac CTA, liver and paranasal sinuses.
- Discuss the common reasons and improve understanding for medical malpractice as it relates to the practice of radiology.

New Common Program Requirements Recognize Osteopathic Training, Certification

The ACGME has made significant changes to its Common Program Requirements that recognize and promote the value of osteopathic training and certification.

Effective July 1, 2019:

- AOA board certification is formally recognized as an appropriate credential for program directors and faculty
- AOA training is accepted for entry into ACGME-accredited fellowship programs
- Program directors are required to give residents information on AOA and other relevant specialty board examinations
- AOA board certification is viewed as equivalent by ACGME

In addition, references to the United States Medical Licensing Examination (USMLE) were removed from the specialty program requirements. Independently, earlier this year the American Medical Association House of Delegates unanimously approved a resolution promoting equal acceptance of the COMLEX and USMLE exams by all U.S. residency programs.

2019 Live Webinar Schedule

All lectures are held at 7 pm CT unless otherwise noted.

July 10 @ 7:30 CT | Ectopic Pregnancy: Rules, Rings and the Role of US
Presented by Lori Strachowski, MD

August | TBA

September 10 | Neuroradiology Webinar
Presented by William Zucconi, DO

October 10 | Pediatric Radiology Webinar
Presented by Bernard Laya, DO

November 14 | Artificial Intelligence Webinar
Presented by Les Folio, DO

December | TBA

Access Webinar Details Here

Our live monthly webinars serve as an excellent resource to supplement student and resident learning curriculum! Don’t forget that registration for student and in-training members is FREE!

Imaging the Acute & Critical Patient

### In Memoriam

Dr. Bishop became an Active Member of the AOCR in 1954 and was elevated to Life Membership in 1988. He was certified by the AOBR in Roentgenology in 1953. After serving as a member of the AOCR Board of Directors for 8 years, he received the title of Fellow of the American Osteopathic College of Radiology.

He served as the Chairman of Radiology at Hillcrest Osteopathic Hospital for several years and fully retired in 1990.

To view Dr. Bishop’s full obituary click here.

Dr. Katz became an Active Member of the AOCR in 1965 and was elevated to Life Membership in 1995. He was certified by the AOBR in Radiology in 1963.

He served as the Chief of Radiology at Art Centre Hospital for many years and worked as a radiologist until the age of 80.

To view Dr. Katz’s full obituary click here.
