

Expanded Psychiatric Services (EPS)

When your benefit plan includes Expanded Psychiatric Services (EPS), you and your covered dependents will receive 100% coverage for mental health and chemical dependency (alcohol and drug abuse services) when care is coordinated by a participating EPS provider. In order to receive maximum benefits, you must first contact an EPS provider to coordinate all services (inpatient, outpatient and emergency room). When you visit a participating EPS provider, you will not have to meet a deductible, make a copayment or file claims.

It is important to check your group benefit materials for more information on your mental health, drug and alcohol abuse benefits when you do not use an EPS provider. Some groups do not offer coverage in this situation.

Covered benefits for mental and nervous disorders, chemical detoxification and rehabilitation services under this program include:

- Inpatient care (you must be admitted by an EPS provider);
- Partial Hospitalization and Intensive Outpatient programs, including mental health, substance abuse, and eating disorder treatment;
- Outpatient visits;
- Individual, group and family therapy or counseling;
- Psychological tests;
- Lab tests; and
- Professional services of staff members who are trained in the treatment of mental health and chemical dependency (psychologists, social workers and other master's prepared professionals as well as psychiatrists).

Exclusions for EPS benefits:

- Speech therapy;
- Diagnosis or treatment of mental retardation;
- Rehabilitative treatment associated with permanent or temporary disability;
- Rehabilitative treatment associated with hearing or vision impairment;
- Any treatment not recommended by the EPS provider, even if court ordered;
- Treatment for chronic pain or solely for obesity;
- Services relating to narcotic maintenance therapy such as methadone maintenance;
- Services related to nicotine addiction;
- Sex therapy programs or treatment for sex offenders;
- Prescription drugs are **not** dispensed by EPS providers and are covered according to contract benefits for drugs related to mental health conditions
- Residential psychiatric facilities.

Participating EPS Providers

Please refer to the list of Participating EPS Providers. Remember, all care (inpatient, outpatient and emergency room) must be coordinated by an EPS provider in order for you to receive maximum benefits. For emergency care after hours or on weekends, call the office nearest you and an operator will connect you with the on-call physician.
