12:30-1:45 pm	<p><b>Storytelling on mobile: making smart choices</b> More than eight in 10 U.S. adults now get news on a mobile device. We need a new storytelling tool kit to attract and better serve our audience on mobile. On a small screen, what's the best way to tell a particular story: digest, explainer, bulleted live updates or what-we-know lists, photo, video, graphic, audio, games, curation, or some combination? And what are the tools to make that happen as efficiently as possible? How is writing for mobile scanners different? – <b>Christy Robinson</b></p>	<p><b>Mining data for enterprise stories off any beat</b> How do you fit enterprise stories around the many other demands you face as a beat reporter to write dailies, file web updates, tweet and shoot video? One way is to take advantage of the plethora of local data available online to spot and develop unique stories for your news outlet. All you need is either you or someone else in your newsroom who can download and sort databases in a spreadsheet program, such as Excel. Learn how to develop a data state of mind, find newsworthy data and begin to analyze data sets. Spot the enterprise stories in the numbers, whether your beat is sports, health, business, education, local government or cops and courts. Bring your laptop for the exercises. No previous data experience is required. – <b>Burt Hubbard</b></p>
