Acute Care Physical Therapy and COVID-19: How Can We Add the Greatest Value?

MARCH 21, 2020

VIEW THE WEBINAR RECORDING

(You’ll be prompted to enter your name and email and then the recording will start)

About the Webinar:
Novel pandemics create great opportunity to challenge the way we utilize our professions’ resources and knowledge bases. As we learn more each day about Coronavirus and COVID-19, we must also push ourselves to rethink how we can best provide care in the hospitals. No one has the answers, but join us for a discussion designed to explore some of these challenges and discuss different perspectives. Topics include: managing and triaging physical therapy resources during pandemic, caring for the critically ill, physical therapy in the emergency department, lessons learned from national health leaders, and caring for yourself in stressful times.

Resources:
- Many valuable references and resources in this Google Doc.
- The slide presentation used during the webinar.

Presented by:
Kyle Ridgeway, PT, DPT, CCS
