University of Tennessee, College of Nursing

The Vine School Health Center

ECBP - 12 - 16 Increase the inclusion of core clinical prevention and population health content in health professions education.

A description is given of the Vine School Health Center, a school-based health clinic that has been in existence since 1996 in an underserved area of Knox County. It is a cooperative effort of the University of Tennessee (UTK), College of Nursing and the Knox County Schools. Its mission is to serve students ages 3 to 21 years of age who are unable to access health care. The clinic serves as a clinical site primarily for undergraduate baccalaureate and NP (graduate) students and an experiential site for high school students interested in health careers.
