~

Dear ARCSEA Members and Friends,

We're inviting you to participate and make a presentation at the 2020 ARCSEA Annual Conference & Expo that will be held November 30-December 4, 2020 in San Antonio, Texas. The theme of 2020 Conference is *Global Impacts of Rainwater Harvesting Systems in Urban Settings*. We're particularly interested in presentations that focus on research and case studies on one or more of the following areas related to RWH systems in urban settings:

- Stormwater runoff reduction and flood control using RWH
- RWH for potable use
- Role of RWH in mitigating water scarcity in urban settings
- RWH impact on potable water use
- Energy use of RWH compared to other water sources
- Potential of RWH to reduce carbon footprint of water consumption due to reduced energy consumption
- RWH use for urban food production, i.e. urban agriculture
- Groundwater recharge using RWH
- Impact of RWH on the esthetic value of urban environments
- Integrating RWH systems and renewable energy use at the local level
- Cost & benefit analysis of large-scale RWH systems

If interested, please submit a one-page abstract with information noted below to ARCSEA: info@arcsa.org by June 15, 2020.

- Abstract title
- Author and co-author(s) name(s)
- Author's and co-author(s)' titles and affiliations
- E-mail address for contact person
- Abstract (150-200 words)

For questions, please contact us at info@arcsa.org

Sincerely,

Tamim Younos
Conference Committee Chair
