The Texas Real Estate Research Center at Texas A&M University seeks a Senior Housing Economist to establish a robust, applied research program for housing in the state of Texas. Under supervision of the Research Director, the subject matter expert will oversee and conduct complex studies in real estate housing economics, answer questions relevant to industry and government constituents, and disseminate findings through writings and presentations. The ideal candidate would have a PhD in Real Estate or Finance and twelve or more years of applied research experience in industry, with progressive responsibility delivering actionable research insights.

**Salary range:** $150,000 - $200,000/annually

**NOTE: This is NON-TENURE position. There are no teaching assignments. As an applied researcher, peer reviewed publications do not satisfy the requirements of the position.**

The Texas Real Estate Research Center was founded in 1971 by an act of the Texas Legislature. The Center’s enabling legislation defines a broad mandate to “conduct studies in all areas related directly or indirectly to real estate and/or urban or rural economics.” In addition to research teams in residential, commercial, and rural land economics, the Center maintains a wide array of datasets and other resources to support its research agenda.
